DISSERTATION

“Everyday” Cosmopolitical Practices in Contested Spaces: Moving Beyond the State of Cosmopolitanism

By focusing on the politics and the political imagination of the “everyday,” I offer an original contribution to cosmopolitical thinking. State-centric notions of extending membership, rights, duties, and even dignity via institutional reforms, international normative conventions, and universal education dominate much of what can be considered familiar cosmopolitan literature. Traditional cosmopolitical visions are often focused on the large-scale, highly visible, and headline-grabbing agendas. Thinking of the cosmopolitical in terms of the “everyday,” however, forces us to imagine what alternative forms of global governance could look like and encourages us to examine everyday cosmopolitical practices that are *already*, and always have been, present. In this work I explore the importance of “everyday cosmopolitical practices” at the U.S./Mexico border. I develop this concept in terms of singularity—or the notion of connectedness prior to and even in defiance of state mandated identity. Documented by extensive fieldwork, I argue that there is a dual performance at play in these practices at the border. On one level, the events I describe are acts of resistance against the state apparatus. Individuals and groups consciously, but carefully, challenge state laws, mandates, and limitations. On another level, these same events are also movements toward some sort of post-national unity, however fragile and fleeting. It is this unique play between singularity, resistance, and solidarity that is most interesting and profound in places such as border regions, where thinking and moving beyond the state, both literally and figuratively, are crucial to making life go on.

Committee: Roxanne Lynn Doty (Chair), Richard K. Ashley, W. Jackson Crittenden
