

# ROWHOME PRODUCTIONS

## **2022 Summer Production Internship**

### **Background**

Rowhome Productions is a Philadelphia-based audio production company. We make podcasts, radio documentaries and audio tours. Founded by veteran producers Alex Lewis and John Myers, we're a full-service agency built on decades of combined experience crafting and delivering high quality audio stories.

### **Production Intern Job Description**

The Rowhome Production Intern will have exposure to many areas of the organization as they become familiar with and contribute to Rowhome's slate of projects. The Production Intern will learn how a radio documentary or podcast series goes from an idea to a reality and assist with various production needs including performing research, logging audio, writing show descriptions and editing audio. Interns will be provided many opportunities for professional development and attend regular meetings with Rowhome's co-founders.

Additionally the Production Intern will support Rowhome in the development and implementation of a social media strategy that tells the stories of Rowhome's projects, showcases its contributors and increases the agency's visibility.

### **Intern Qualifications**

The ideal candidate will be based in the Philadelphia area and have a strong interest in the intersection of podcasting and social media. Being a self-starter with solid writing skills, a good eye for photography and a natural ability to tell compelling stories on Instagram and Twitter are valuable qualities. Access to and familiarity with a digital audio workstation such

as ProTools, Adobe Audition, or Hindenburg is a major plus. And having access to reliable transportation for occasional local trips is preferable.

### **Skills Gained**

Throughout the internship the intern will gain and/or improve skills in the following areas: Audio production and narrative storytelling, social media content creation and project administration.

### **Location / Work Environment**

Remote with some in-person meetings and field production likely
