

HAVERFORD COLLEGE
UNUSUAL LABORATORY EVENTS RECORD

The Unusual Laboratory Events Record is written to record incidents that may cause a threat to the safety or health of those involved in the incident.

An unusual event will include the following incidents that may occur during laboratory work:

- a sickness or an injury
- over-exposure to a hazardous chemical
- an uncontrolled reaction during an experiment
- an uncontrolled chemical spill
- a loss of engineering control features (ventilation problems).

The report below will be forwarded to the Department Chairperson and the Safety Coordinator and will be maintained as part of the Laboratory Safety Standard documentation.
