*“A Statistical Journey through Historic Haverford”*

**Abstract:** Using data provided by Haverford's Facilities Management Department, we delve into Haverford's historic past in the search of statistical significance. Modern and classical statistical tools aid our journey and uncover little-known tidbits about Haverford. Is Founders Hall the oldest building on campus? Is there a relationship between the size and age of Haverford's buildings? Does construction at Haverford follow a Poisson process? Thought there was something different about the Science Center but couldn't put your finger on it? Let statistics open the doors to your imagination!
