“Visualization in High School Mathematics”

Monday, February 11, 2013

Talk at 4:00 – E309

Tea at 3:00 – KINSC Math Lounge, H208

Abstract:

I will talk about the sequence of courses in the math program, 6th through 12th grade, at the University of Chicago Laboratory Schools. I will use examples, from each math course I teach, to discuss the importance of visualization in helping students learn math at the high school level. I will give a flavor of what life is like as a high school math teacher at UHigh.
