Stress & Coping Seminar (PSYCH 337)

Spring 2019 Course Syllabus
Tues 1:00 – 3:50pm, 416 Sharpless Hall

***Election stress neuroscience article – Tashjian Galvan 2018
***1x p/week format
***Research Design workshop earlier
***No library workshop needed
*** Add GUTS model Brosschot Verkuil Thayer 2016 J of Anxiety Disorders
***Emphasize there MUST BE A COMPLETE DRAFT, grade will take this into account. Grade will take into account effort and participation in the review. First review should be ABC, then CDEFG.
***More guest speakers?
***Group presentations throughout the earlier-mid part of semester, not grouped at end, schedule in group work days on syllabus
***Add an article about war vets or PTSD or moral injury to Trauma week
***Activity – stress, incarceration, design programs – see student presentation
***Robles paper on telomere and stress

Instructor: Shu-wen Wang, PhD, Assistant Professor
Contact: swang1@haverford.edu, x6234
Office: 410 Sharpless Hall
Office Hours:

Course Description and Objectives

Stressors and their subjective experience – stress – are a part of everyday life, whether minor or major, acute or chronic. How one copes with stress has substantial influence on one’s physical, emotional, cognitive, and interpersonal functioning. This seminar course is designed to provide in-depth study of the field of stress and coping, through brief lectures, discussion of readings, student presentations and contributions, and the practice of stress management exercises.

This seminar course will survey theory, research, and intervention across a range of topics, including: the neurobiology of stress (e.g., the HPA axis, the immune system), disease (e.g., cardiovascular disease, cancer) and mental illness (e.g., depression, anxiety), ecological stressors (e.g., social and community factors, catastrophes), common life stressors (e.g., work, interpersonal conflict), and diversity-related stressors (e.g., racism, culture-related). Moderating factors influencing stress and coping such as dispositional factors (i.e., personality), gender, and use of social support will be covered. Students will also learn and practice evidence-based stress management techniques and therapeutic strategies.

By the end of the course, students are expected to:
1) Understand how stress responses influence physiology, disease, and mental illness.
2) Think critically about the nature and function of stress and the stress-response.
3) Understand the various sources of stress.
4) Understand factors that can moderate the stress response.
5) Learn stress management practices and how to design and implement a stress management plan.

Pre-requisites
Psyc 100 and one of the following: HC Psyc 209, 215, 224, 242, 245.
Course Readings

- Additional required readings are available via the course website (Moodle).

- Consult the APA Publication Manual for guidance on proper reference citation and general guidance on scientific writing. On reserve in the Science Library.

Slides -- Slides will be posted on Moodle for your reference AFTER the class lecture.

Support, Access, and Disability
Haverford College is committed to supporting the learning process for all students. Please contact me as soon as possible if you are having difficulties in the course. There are also many resources on campus available to you as a student, including the Office of Academic Resources (https://www.haverford.edu/oar/), the Writing Center (https://www.haverford.edu/writing-center/), and the Office of Access and Disability Services (https://www.haverford.edu/access-and-disability-services/). If you think you may need accommodations because of a disability, you should contact Access and Disability Services at hc-ads@haverford.edu. If you have already been approved to receive academic accommodations and would like to request accommodations in this course because of a disability, please meet with me privately at the beginning of the semester (ideally within the first two weeks) with your verification letter.

Course Requirements
Grades are determined based on the following course requirements:

1. Article Presentation 10%
2. Weekly Reaction Posts on Moodle 10%
3. Student Topic Group Presentation 20%
4. Stress and Coping Report 25%
5. Research Proposal 25%
6. Attendance and Participation 10%

Total = 100%

1) Article Presentation (10%): Each student will be responsible for giving a brief report on an empirical article that s/he selects. The article must be of empirical research (i.e., data were collected and analyzed, article has method and results sections), NOT theoretical or literature review articles. Each student will select an article corresponding to that day’s topic by doing a literature search and consulting with me. You will read the article and prepare a formal oral presentation. Please use slides judiciously (no more than 8 slides; 1-2 for introduction/research questions, 1-2
for methods, 2-3 for results, 1 for discussion/implications). The presentation should be brief (~10-12 minutes) and present the study’s main hypothesis(es) or research question(s), the methods by which the hypothesis was tested, the main findings, and the implications of the findings. Your emphasis should be on the results and the take-away message, as opposed to the minutia of the methods or the statistics. You must get your article approved by me beforehand and submit a PDF copy of the article (not HTML format) to me by email at least 24 hours before your scheduled day. Grades for the presentation are based on how accurately and thoughtfully you presented the information.

2) Weekly Reaction Posts on Moodle (10%): By 9pm Monday of every week (Weeks 2-13), you will post a brief reaction (1-2 paragraphs) to that week’s readings using Moodle Forum. You should aim for thoughtfulness, rather than length. Reactions can be a range of things, but for example, may include putting forth your own hypotheses with supporting rationale, voicing a contradictory argument, commenting on a general theme drawn from multiple readings, or finding a way to apply what you are reading to a real-world problem or situation.

3) Student Topic Group Presentation (20%): The last few meetings of the course are reserved for Student Topic presentations. The topics are chosen by the class and presented by groups of 2-4 students. With my help, groups will research the topic, assign a reading, prepare a 20-25 min presentation, and lead discussion. More information will be provided.

4) Stress and Coping Report (25%): This assignment is a 10-12 page paper on a personal stress and coping situation, your analysis of the issues using theory and research, and your development of a plan to better cope with the situation. More information will be provided.

5) Research Proposal (25%): You will write a 10-12 page research proposal on a topic of your choice related to the seminar, due during finals period. You will conduct a literature review, develop your hypotheses and a study design that would allow you to test those hypotheses, describe how you would conduct the study, and discuss your anticipated results that would support your hypotheses. You will also provide and receive feedback from your peers during the writing process. More information will be provided.

6) Attendance and Participation (10%): This course is designed as a seminar and is largely based on discussion. Your attendance is expected at every class meeting, and your contribution and energy is critical to the success of the class.

**Grading Scale**

<table>

**FINAL RESEARCH PROPOSAL**

**DUE FRI 12/22 noon**

### Additional Readings (available on Moodle)

**Class Policies**

- **Academic Integrity:** I have zero tolerance for academic dishonesty of any kind. This includes ‘cheating’ (giving or obtaining assistance on exams) as well as plagiarism (using another person’s work, words, or ideas without properly crediting them). Follow the Haverford College Honor Code. Consult the APA Publication Manual.

- **Phone and Laptop Etiquette:** Please turn off or silence your cell phones. No texting.

Because this is a seminar course, I strongly discourage the use of laptops. If you wish to use a laptop, please discuss with me first. I reserve the right to ask you to leave the class if I suspect you are engaging in non-class related activities.

- **Office Hours:** I strongly encourage you to visit me during office hours to ask questions and discuss assignments. I hope that EACH of you will come visit at least ONCE this semester.

- **Emails:** I will try to respond to emails within 24 hours. The more specific your question and the more you’ve thought about it, the better I’ll be able to address it. For any question that requires an extensive response, I may ask you to come to office hours instead.
- **Late Papers:** My policy on late papers is that for each 24 hour period of lateness, I'll deduct one grade point level. For example, if the paper is due Monday 5pm and you submit the paper Tues 4pm (within 24 hours), your original 3.3 would now become a 3.0. If you submit the paper Tues 5:30pm (past 24 hours), your original 3.3 would now become a 2.7.

- **Grade Disputes:** If you believe that you did not receive a fair grade on an exam or paper, you may submit a written grade dispute to me. The typed grade dispute should include the reason why you believe your work/answer is correct including references to readings or lecture material for support, and the number of points you feel you should have received. The dispute should be submitted to me (in my hand or under my door; no emails) along with the original assignment within 1 week after the exam or the date the paper was returned to you. I will consider your case and make any adjustments at my discretion.
