## Using the EV Chargers: a step-by-step guide

---

- 1** Create an account with the EV charging service “Flo” by downloading the app on your smartphone. You may then choose to order an access card, which allows you to initiate charging sessions without your smartphone. While this is not required, it can be helpful.
- 2** After parking your EV next to the charger, activate the station by either:
  - Placing your card on the reader
  - Opening the Flo app, selecting “Stations Map”, selecting the magnifying glass in the bottom right corner, entering the charger code (something like AUB-12345), and then selecting “Start a session”
- 3** Pick up the connector, unwind the cable to the length required, and plug the connector into your vehicle. Charging will start immediately.
- 4** Once charging is complete, replace the connector in its socket. Please be sure to wind the cable and store connector in the socket securely.

Call Flo directly at 1-855-543-8356  
with any questions or technical issues.
