

HVERFORD COLLEGE

DO-IT-YOURSELF PINWHEEL TEMPLATE

Materials: Scissors + a straight pin + a pencil with eraser

Instructions: Decorate your pinwheel paper. Cut along the dashed line, then down the diagonal lines. Gently bend (don't fold) alternating corners until 4 points meet in the center. Stick the pin through all 4 points and into the pencil eraser.

Optional: Cut out the squirrel or the cupola and put it in the center before you stick the pin through to make your pinwheel extra Haverfordian.

Show us your pinwheels!
