**Dental Panel**

The College has offered a dental program for a number of years, as a component of the employment benefits package and understands the value that many employees find in the program and its ease of use. It is our collective goal to preserve these virtues in an ongoing and sustainable way.

The panel is intended to offer a range of dental services to employees designed to promote and support good dental health amongst the Haverford community. As the services provided are not comprehensive, please know that they do not cover the full range of dental needs an employee, partner, or dependent may need. Please see the list of covered dental services shown below.

As widely discussed last year, the College has initiated a cost share component for employees (and their partners and dependents) who elect to participate in its dental panel benefit. This cost share component is intended to provide some support, financially, in the continuation of the dental panel as has been historically provided by the College. The College retains the discretion to change, alter or conclude the dental panel or benefit, if necessary in the future.

Employees may not participate in the dental panel until employed by the College, on a full-time basis, for one year. Part-time benefit eligible employees may enroll in their second year of employment with the college. Eligible employees, their spouses/partner/dependents, and including children up to age 26, are covered under this plan.

The doctor-patient relationship between the dentist and the employee remains unchanged and the College does not play a role in the dentist-patient relationship. As such, the College has not undertaken a clinical or other review of the dentists/dental practices. Each participating employee should continue to conduct his/her own review or diligence.

The program is entirely voluntary.

**To enroll, all employees must affirmatively-opt into the dental panel program during this open enrollment period, even if they have visited a dental panel dentist in the past.** Monthly cost share amounts shown below will be deducted as an after-tax “payroll deduction” effective January 1, 2017. The cost share is a fixed monthly amount for calendar year 2017 and is not related to the number of dentist visits or the covered services provided. Note that your cost share is not refundable even if you do not use the dental panel in the year.
