Numbering System & Symbols

001-009 elementary courses.
100-199 first-year and introductory courses.
200-299 second-year courses.
300-399 advanced courses.
400-499 special categories of work (e.g., 480 for independent study courses).

The suffixes (following a number) indicate:

A: one-credit course given in the Fall Semester.
B: one-credit course given in the Spring Semester.
C: one-credit course given throughout the year.
D: half-credit course given during September-October.
E: half-credit course given during November-December.
F: half-credit course given throughout the first semester.
G: half-credit course given during February-March.
H: half-credit course given during April-May.
I: half-credit course given throughout the second semester.
J: half-credit course given throughout the year.

Academic Calendar

SEMESTER II (SPRING 2024)	
Monday, January 15	Martin Luther King Day - Classes not in session
Monday, January 22	Classes begin at Haverford, Bryn Mawr, and Swarthmore
Friday, January 26	Last day to uncover Pass/Fail courses from previous semester
Wednesday, January 31	Final academic verification at Haverford and Bryn Mawr Registration ends
Friday, February 9	Last day to drop a credit at Haverford and Bryn Mawr
Friday, February 23	Faculty reports of concern to CSSP due Academic Flexibility Petitions to CSSP due
Friday, March 8	First quarter classes end Last day to request Pass/Fail, First Quarter courses only Spring break begins at 4:00 p.m.
Monday, March 18	Classes resume at 8:30 a.m. Second quarter classes begin
Wednesday, March 27	Last day to drop second quarter class
Friday, March 29	Faculty reports of concern to CSSP due Academic Flexibility Petitions to CSSP due
Monday, April 8	Pre-Registration for fall semester begins
Friday, April 19	Pre-Registration for fall semester ends Major Declaration Forms due in Registrar's Office Returning students' Financial Aid Applications due
Friday, May 3	Classes end at Haverford and Bryn Mawr Last day to request Pass/Fail, full semester & 2nd quarter courses All papers (except those in lieu of exams) and lab notebooks due
Saturday, May 4 - Tuesday, May 7	Reading Period
Monday, May 6 - Wednesday, May 8	Senior Comprehensive Examinations Optional Final Examination Period
Wednesday, May 8	Final Examination Period begins
Saturday, May 11	Final examinations for Seniors due at 5:00 p.m.

Monday, May 13	Senior Grades due in Registrar's Office by 5:00 p.m.
Friday, May 17	Semester II ends at noon Final examinations for non-Seniors due at noon
Saturday, May 18	Commencement at Haverford College – 10:00 a.m.* Commencement at Bryn Mawr College
Friday, May 24	Final grades due in the Registrar's Office by 12:00 noon
Friday, May 31 - Sunday, June 2	Alumni Weekend (Tentative)

*Subject to change

Haverford College Spring 2024 Course Guide

Subject	Cat Nbr	CLNbr	Sctn	Crd	Instructor(s)	Days	Start	End	Room	Enrld
AFST	H214B				The Black Power Movement					
This course examines the history, politics, and culture of the black power movement in the United States. We will explore the intellectual and political activities of major activists and organizations during the 1960s and 1970s. We will also examine the black power movement's global dimensions in addition to its connection to other social movements and political traditions including black feminism, Marxism, Pan-Africanism, and gay liberation. By the end of this course, students will have a solid understanding of the ways black power transformed both politics and culture in the United States after World War II.										
Crosslisted: HIST.										
Enrollment Limit: 25.00										
<i>Attributes: A: Meaning, Interpretation (Texts) Africana Studies B: Analysis of the Social World Social Science</i>										
	2879	001	1.0	Kevin Quin		T Th	10:00AM	11:25AM		0
	2879	001	1.0	Kevin Quin		T Th	10:00AM	11:25AM		0
AFST	H254B				RAP and Religion: Rhymes about God and the Good					
We will explore the origins, existential, and ethical dimensions of Rhythm and Poetry (RAP) music. Giving attention to RAP songs written and produced by African American artists, including Tupac, Nas, Jay-Z, The Roots, Lauryn Hill, and Kanye West, we will analyze their work with an interest in understanding a) the conceptions of God and the good reflected in them, b) how these conceptions connect to and reflect African American social and cultural practices, and c) how the conceptions under consideration change over time.										
Enrollment Limit: 25										
Lottery Preference(s): Senior religion majors, then junior religion majors, then all others										
<i>Attributes: Africana Studies B: Analysis of the Social World Humanities</i>										
	1675	001	1.0	Terrance Wiley		T	7:30PM	9:55PM		0
AFST	H302B				Black Queer Studies					
This seminar examines the intellectual and political issues at stake in the field of black queer studies. Black queer studies consists of theories and methods that examine how race, gender, and sexuality intersect in ways that shape our everyday lives. We will explore foundational texts, central themes, and key debates within black queer studies in relation to other fields of thought including queer of color critique, African diaspora studies, and trans studies.										
Crosslisted: GSST.										
Enrollment Limit: 15.00										
<i>Attributes: A: Meaning, Interpretation (Texts) Africana Studies B: Analysis of the Social World Gender and Sexuality Studies Social Science</i>										
	2881	001	1.0	Kevin Quin		Th	1:30PM	3:55PM		0
ANTH	H103B				Introduction to Anthropology					
An introduction to the basic ideas and methods of social anthropology. Examines major theoretical and ethnographic concerns of the discipline from its origins to the present, such as family and kinship, production and reproduction, history and evolution, symbolism and representation, with particular attention to such issues as race and racism, gender and sexuality, class, and ethnicity.										
Prerequisite(s): Not open to students who have completed BMC ANTH 102										
Enrollment Limit: 40										
<i>Attributes: B: Analysis of the Social World Social Science</i>										
	1725	001	1.0	Zolani Noonan-Ngwane		M W	11:30AM	12:55PM		0
ANTH	H222B				Human Rights and Culture					
This course offers an overview of the human rights system, looking at its basic elements and studying how it works. At the heart of this course is the question of "culture" and its relation to human rights. We will focus on the tensions and translations between human rights and culture and between global ideas and practices and local ones. The goal of the course is developing an understanding of human rights in practice and theorizing the intersections between social fields thought of as global and local.										
Crosslisted: Anthropology; Peace, Justice and Human Rights										
Prerequisite(s): Intro to Anthropology OR Intro to PJHR

ANTH	H233B	Decolonizing Visual Anthropology								
This is a hybrid video production and theory course which grapples with the entanglements between ethnographic film/documentary and colonial structures of power. We will bring a decolonizing lens to explore—through texts, screenings, and making films—major modalities in the field including sensory ethnography, indigenous media, and feminist experimental film.										
Crosslisted: Visual Studies, Anthropology										
Prerequisite(s): at least one course in Anthropology or Visual Studies										
Enrollment Limit: 8										
Lottery Preference(s): Visual Studies minors and Anthropology majors/minors										
Attributes: A: Meaning, Interpretation (Texts) B: Analysis of the Social World Social Science Visual Studies

ANTH	H265B	Medical Anthropology								
What does it mean to attempt a critical anthropology of the body, illness experience, disease etiology, healing practices, and the epistemology of contemporary biomedicine across a diverse group of cultures and traditions? This course seeks to begin to answer this and other questions by examining the historical development of the field of medical anthropology, exploring the theoretical and philosophical underpinnings of the debates that have shaped the field, and examining the methodological concerns and ethnographic investigations that have broadened the scope of its inquiry. Readings range from classical ethnographic writings, philosophical treatises, anthropological theory, indigenous philosophers, and first person accounts of illness and health.										
Enrollment Limit: 25										
Lottery Preference(s): 1.) Health Studies minors 2.) Anthropology majors and minors										
Attributes: B: Analysis of the Social World Health Studies Humanities										
	2434	001	1.0	Michael D'Arcy		T Th	1:00PM	2:25PM		0
ANTH	H277B	Media and the Middle East								
What can we learn about the Middle East by examining media? What can we about media by studying institutions of production and practices of consumption in the Middle East region? In this course, we will read ethnographies of media from the Middle East and look at and listen to media. We will explore cases from different countries, from Egypt to Syria, Turkey to Afghanistan, from Lebanon to Palestine/Israel.										
Crosslisted: VIST.										
Pre-requisite(s): 100-level course in social sciences, or humanities.										
Lottery Preference: Senior anthropology students have a priority to take the class.										
Enrollment Limit: 25.00										
Attributes: B: Analysis of the Social World Social Science Visual Studies

ANTH	H335B				The Anthropology of Ecstasy: Psyche, Soma, and the Out-of-Body How should contemporary anthropology understand trance, possession, and ecstatic experience? Through course readings, we will interrogate normative understandings of the relationship between mind, body, and collective life via a range of classical and contemporary anthropological texts. Drawing upon diverse theoretical paradigms such as symbolic and structural anthropology, psychoanalysis, and phenomenology, we will explore the ways in which individual engagements with collective life act directly upon and constitute this mind/body interface, at times destabilizing it altogether. Crosslisted: HLTH. Pre-requisite(s): 200 level course in the social sciences Lottery Preference: I would prefer students who are majoring in anthropology and/or health studies be given preference. Enrollment Limit: 15.00 Attributes: B: Analysis of the Social World Health Studies Social Science					
		1776	001	1.0	Michael D'Arcy	W	1:30PM	3:55PM		0
ANTH	H337B				Anthropology of Writing and the Politics/Poetics of Intertextuality An interdisciplinary exploration of writing as a social institution, personal ritual, cultural artifact and a technology, this course theorizes the interface between tradition and innovation as a way to think about intertextuality using Jewish American fiction as a case study Crosslisted: COML Attributes: B: Analysis of the Social World Social Science					
		2558	001	1.0	Zolani Noonan-Ngwane	F	1:30PM	3:55PM		0
ANTH	H451B				Senior Seminar: Supervised Research and Writing The spring semester of the two-semester senior thesis seminar. Students complete research on their thesis and write an ethnography. Most of the semester is individual meetings between thesis writers and advisors. The spring senior thesis seminar includes a public thesis presentation and an oral exam. Attributes: B: Analysis of the Social World Social Science

Haverford College Spring 2024 Course Guide

Subject	Cat Nbr	CLNbr	Sctn	Crđ	Instructor(s)	Days	Start	End	Room	Enrld					
					This is a seven-week, half semester course designed to provide an introduction to three dimensional concepts and techniques. Skills associated with organizing and constructing three-dimensional form will be addressed through a series of projects within a contemporary context. The first projects will focus on basic three-dimensional concepts, while later projects will allow for greater individual self-expression and exploration. Various fabrication skills including construction, modeling, basic mold making, and casting will be demonstrated in class. All fabrication techniques will be covered in detail in class, and no prior experience is required to successfully complete this course Enrollment Limit: 15 Lottery Preference(s): Fine Arts Majors Attributes: A: Creative Expression Humanities Visual Studies 1205 001 .5 Markus Baenziger	W	1:30PM	3:55PM		0					
ARTS	H104H	Arts Foundation-Sculpture This is a seven-week, half semester course designed to provide an introduction to three dimensional concepts and techniques. Skills associated with organizing and constructing three-dimensional form will be addressed through a series of projects within a contemporary context. The first projects will focus on basic three-dimensional concepts, while later projects will allow for greater individual self-expression and exploration. Various fabrication skills including construction, modeling, basic mold making, and casting will be demonstrated in class. All fabrication techniques will be covered in detail in class, and no prior experience is required to successfully complete this course Enrollment Limit: 15 Lottery Preference(s): Fine Arts Majors Attributes: A: Creative Expression Humanities Visual Studies 1198 001 .5 Markus Baenziger									W	1:30PM	3:55PM		0
ARTS	H106G	Arts Foundation - Drawing This is a seven-week introductory level course designed to provide an overview of basic drawing techniques addressing line, form, perspective, and composition. Various drawing methods will be introduced in class, and students will gain experience in drawing by working from still life, models, and architecture. Preference to declared majors who need Foundations, and to students who have entered the lottery for the same Foundations course at least once without success. Enrollment Limit: 18 Attributes: A: Creative Expression Humanities Visual Studies 1208 001 .5 Zachary Hill									M	1:30PM	3:55PM		0
ARTS	H106H	Arts Foundation - Drawing This is a seven-week introductory level course designed to provide an overview of basic drawing techniques addressing line, form, perspective, and composition. ARTS	H108H	Arts Foundation-Photography This is a half-semester course to introduce the craft and artistry of photography to students with some or no skills in photography. Students learn how to develop negatives, print enlargements, and printing techniques such as burning, dodging, and exposure time. This class also requires a two-hour workshop. The day and time of the workshop will be determined during the first class. Offered in the second quarter. Enrollment Limit: 15 Attributes: A: Creative Expression Humanities Visual Studies								
		1202	001	.5	William Williams	M	1:30PM	3:55PM		0
ARTS	H121H	Foundation Printmaking- Relief Attributes: Humanities								
		1209	001	.5	Hee Sook Kim	W	10:00AM	12:25PM		0
ARTS	H124G	Foundation Printmaking: Monotype Basic printmaking techniques in Monotype medium. Painterly methods, direct drawing, stencils, brayer techniques for beginners in printmaking will be taught. Color, form, shape, and somposition in 2-D format will be explored. Individual and group critiques will be employed. Enrollment Limit: 15 Attributes: A: Creative Expression Humanities Visual Studies								
		1204	001	.5	Hee Sook Kim	W	10:00AM	12:25PM		0
ARTS	H224B	Computer and Printmaking Computer-generated images and printmaking techniques. Students will create photographic, computer processed, and directly drawn images on lithographic polyester plates and zinc etching plates. Classwork will be divided between the computer lab and the printmaking studio to create images using both image processing software and traditional printmaking methods, including lithography, etching, and silk-screen. Broad experimental approaches to printmaking and computer techniques will be encouraged. Individual and group critiques will be employed. enrollment limit: 12 Lottery Preference: Fine Arts Major and Minors Attributes: A: Creative Expression Humanities Visual Studies								
		2339	001	1.0	Hee Sook Kim	Th	10:00AM	12:25PM		0
ARTS	H233B	Painting: Materials and Techniques Students are encouraged to experiment with various painting techniques and materials in order to develop a personal approach to self-expression. We will emphasize form, color, texture, and the relationship among them; influences of various techniques upon the expression of a work; the characteristics and limitations of different media. Students will work from observation, conceptual ideas and imagination. Course includes drawing projects, individual and group crits, slide lectures, museum and gallery visits. Prerequisite: Fine Arts Foundations or consent. Attributes: Humanities Visual Studies								
		1641	001	1.0	Jonathan C. Goodrich	T	1:30PM	3:55PM		0
ARTS	H243B	Sculpture: Materials and Techniques This course is designed to give students an in-depth introduction to a comprehensive range of three-dimensional concepts and fabrication techniques. Emphasis will be on wood and metal working, and additional processes such as casting procedures for a range of synthetic materials and working with digital tools including a laser cutter and CNC equipment will be introduced in class. Course may be repeated for credit. Attributes: A: Creative Expression Humanities Visual Studies								
		2335	001	1.0	Markus Baenziger	W	10:00AM	12:25PM		0

Haverford College Spring 2024 Course Guide

Subject	Cat Nbr	CLNbr	Sctn	Crd	Instructor(s)	Days	Start	End	Room	Enrld
ARTS	H251B	Photography: Materials and Techniques								
	Students are encouraged to develop an individual approach to photography. Emphasis is placed on the creation of color photographic prints which express plastic form, emotions and ideas about the physical world. Work is critiqued weekly to give critical insights into editing of individual student work and the use of the appropriate black-and-white photographic materials in analog or digital formats necessary to give coherence to that work. Study of the photography collection, gallery and museum exhibitions, lectures and a critical analysis of photographic sequences in books and a research project supplement the weekly critiques. In addition students produce a handmade archival box to house their work, which is organized into a loose sequence and mounted to archival standards. Prerequisite: Fine Arts 103 or equivalent.									
	Prerequisite: Fine Arts 103 or equivalent. Attributes: A: Creative Expression Humanities Visual Studies									
	1203	001	1.0	William Williams		M	10:00AM	12:25PM		0
ARTS	H343B	Experimental Studio: Sculpture								
	In this studio course the student is encouraged to experiment with ideas and techniques with the purpose of developing a personal expression. It is expected that the student will already have a sound knowledge of the craft and aesthetics of sculpture and is at a stage where personal expression has become possible. May be repeated for credit.									
	Prerequisite: Fine Arts 243A or B, or consent of instructor Attributes: A: Creative Expression Humanities Visual Studies									
	1207	001	1.0	Markus Baenziger		Th	10:00AM	12:25PM		0
ARTS	H460B	Teaching Assistant								
	Attributes: Humanities									
	1524	001	1.0	TBA Department staff						0
ARTS	H499B	Senior Departmental Studies								
	The student reviews the depth and extent of experience gained, and in so doing creates a coherent body of work expressive of the student's insights and skills. At the end of the senior year the student is expected to produce a show of his or her work.									
	Prerequisite: Senior Majors Attributes: Humanities									
	1199	001	1.0	Hee Sook Kim		W	7:00PM	9:25PM		0
ASTR	H101B	Astronomical Ideas								
	Fundamental concepts and observations of modern astronomy, such as the properties of planets, the birth and death of stars, and the properties and evolution of the Universe. Not intended for students majoring in the physical sciences.									
	Enrollment limit: 30 Attributes: C: Physical and Natural Processes Natural Science Quantitative									
	1593	001	1.0	Islam Khan		M W F	10:30AM	11:25AM		0
ASTR	H104B	Topics in Intro Programming: Physics and Astronomy								
	Topics in Introductory Programming is designed to give a general introduction to programming as related to data analysis across many fields. Students will be introduced to standard introductory programming imperative and object oriented techniques as well as data structures necessary to create efficient and understandable algorithmic solutions to problems. This course satisfies the prerequisite for CMSC 107.									
	Antirequisite(s): Students who have taken a semester of college-level computer science (e.g.,CMSC105) or placed into CMSC107 are ineligible to take this course. It is intended for students with little or no background in computer programming. This course is equivalent to CMSC 104. Enrollment Limit: 24 Lottery Preferences: first years, then sophomores, then all other students.									
	Attributes: C: Physical and Natural Processes Natural Science Quantitative

ASTR	H352I	Topics in Astrophysics: Extragalactic Data Science								
		A 0.5 credit upper level astronomy/astrophysics elective, which can be taken in series with the other 0.5 credit upper level Astro elective offered the same semester, or as a stand-alone course. This class will cover the basics of modern extragalactic science (a review of our knowledge of the Milky Way and external galaxies) alongside hands on projects involving data science/statistical techniques used to investigate them. Assessment will be highly project based, with regular coding assignments (in python) done during class time, and guided reading of both current, and classic astrophysical literature. Students will leave with an understanding of extragalactic astrophysics as a modern data focused science. Crosslisted: PHYS. Pre-requisite(s): ASTR204 Attributes: C: Physical and Natural Processes Natural Science								
		2413	001	.5	Karen L. Masters	M	1:00PM	2:25PM		0
ASTR	H356I	Topics in Physics/Astronomy: Introduction to Astroparticle Physics								
		Astroparticle physics is the study of fundamental particles traveling through space coming from various astrophysical sources. The energies of some of these particles are much higher compared to the ones achievable by the most powerful human-made particle accelerators. In this course, we will learn about cosmic rays, Gamma-rays, neutrinos, neutrino oscillations and masses, dark matter cross-section, freezeout, evidences, candidates, and searches. There will be an emphasis on dark matter and neutrino physics and detection. Crosslisted: ASTR. Pre-requisite(s): ASTR 204 or BMC equiv. PHYS 214 or BMC equiv. (can be taken concurrently) Lottery Preference: Juniors and seniors majoring in physics, astrophysics, and astronomy. Enrollment Limit: 15.00 Attributes: C: Physical and Natural Processes Natural Science Quantitative

BIOL	H104B	Introduction to Programing in Biology									
		DNA sequencing and high-throughput experiments generate huge amounts of biological data, which biologists explore with computational tools. This course serves as a general introduction to such programing by applying the Python programming language to experimental evolutionary biology. We will use programming skills to investigate how evolution can modify populations in specific ways; students will build a computational, evolutionary 'reactor' in which simulated RNA molecules fold into 3D shapes, mutate, reproduce, and evolve as a population.									
		Pre-requisite(s): No prerequisites, but anti-requisite of: CMSC 105 / 107; Bryn Mawr's CMSC 110; or placement into a higher course than CMSC 105.									
		Lottery Preference: First-year students, then second-year students, then third year students.									
		Enrollment Limit: 25.00									
		Attributes: C: Physical and Natural Processes Natural Science									
		2572	001	1.0	Eric Miller	M W	11:30AM	12:55PM		0	
		2573	00A	.0	Sara Mathieson					0	
		2574	00B	.0	Sara Mathieson					0	
BIOL	H201B	Molecules, Cells, & Organisms									
		Three hours of lecture and one laboratory period per week. A one-year course in cellular and molecular biology, Biology 200 considers the cell as a unit of biological activity. Biology 200B is an introduction to the major macromolecules of the cell, which includes a discussion of their synthesis and breakdown and leads into a discussion of cellular structures. The laboratory introduces the student to cell and molecular biology and biochemistry.									
		Enrollment per lab section is limited to 28. Preference for a specific lab section will be given to students preregistering for that lab section; students who do not preregister will be assigned on a space available basis. When two sections of the lecture component are offered one lecture section will be limited to 50. Four sections, limited to 28.									
		Prerequisite(s): BIOL H200 with a grade of 2.0 or higher, or instructor consent

BIOL	H301B	Advanced Lab in Biology Sem 2									
		One lecture and two laboratory periods per week. An introduction to the application of modern experimental approaches in the study of interesting biological questions. Techniques employed are drawn from: cloning and nucleic acids (DNA and RNA) manipulation, including polymerase chain reaction (PCR) and site-directed mutagenesis; protein expression, purification and characterization, with emphasis on circular dichroism and fluorescence spectroscopy; immunofluorescence, confocal and electron microscopy; and fluorescence-activated cell sorting (FACS) analysis. Preference for a specific lab section will be given to students preregistering for that lab section; students who do not preregister will be assigned on a space available basis.									
		Prerequisite(s): BIOL H200 and BIOL H201 with a grade of 2.0 or above, or instructor consent									
		Enrollment Limit: 32									
		Lottery Preference(s): Biology majors

					Prerequisite(s): BIOL H200 and BIOL H201 with a grade of 2.0 or above, or instructor consent Enrollment Limit: 25 Attributes: <i>Biochemistry and Molecular Biology</i> <i>Biophysics</i> <i>Health Studies</i> <i>Natural Science</i> 2497 001 .5 Foen Peng	T Th	10:00AM	11:25AM		0					
BIOL	H312H	Development & Evolution This course introduces important links between developmental and evolutionary biology. Genetic changes that produce variations between organisms are an important aspect of evolutionary change. Since development can be viewed as a process that links genetic information to final form of an organism, the fields of development and evolution clearly impact one another. We will look at model developmental systems where mechanisms have been elucidated in remarkable detail. We will then look beyond model systems to comparative studies in a range of organisms, considering how these provide insight into evolutionary mechanisms, and how underlying differences in development may account for the differences we see between organisms. Prerequisite(s): BIOL H200A and B with a grade of 2.0 or above, or instructor consent Attributes: <i>C: Physical and Natural Processes</i> <i>Natural Science</i> <i>Neuroscience</i> 2495 001 .5 Rachel Hoang									T Th	8:30AM	9:55AM		0
BIOL	H325H	Molecular Virology This course will focus on the study of virus structure, genome organization, replication, and interactions with the host. Many different families of viruses will be highlighted, with an emphasis on those that infect humans, and specific viruses, especially those of clinical importance, will be incorporated as models within each family. Prerequisite(s): BIOL H200 and BIOL H201 with a grade of 2.0 or above, or instructor consent Enrollment Limit: 25 Attributes: <i>C: Physical and Natural Processes</i> <i>Health Studies</i> <i>Natural Science</i> 2627 001 .5 Eric Miller									T Th	10:00AM	11:25AM		0
BIOL	H335H	Bioinformatics This course will provide an introduction to the interdisciplinary field of Bioinformatics. Students will learn a variety of approaches for the acquisition, organization, analysis and interpretation of biological data sets using computational tools. Pre-requisite(s): BIOL H200 and BIOL H201 with a grade of 2.0 or above, or instructor consent Enrollment Limit: 25 Attributes: <i>C: Physical and Natural Processes</i> <i>Natural Science</i> 2890 001 .5 Geoffrey Hutinet									M W	10:00AM	11:25AM		0
BIOL	H336H	The Cell Cycle This course will focus on an examination of the eukaryotic cell cycle, a complex sequence of events that take place as cells grow and divide. Proper regulation of the cell cycle is critical in biological systems, and dysregulation can lead to diseases such as cancer. The key roles of cyclins and cyclin-dependent kinases in governing cell cycle check points will be examined, as well as the functions of oncogene and tumor suppressor gene products. Enrollment Limit: 25 Lottery Preference(s): Seniors and then Juniors, or by permission of instructor Attributes: <i>C: Physical and Natural Processes</i> <i>Natural Science</i> 2626 001 .5 Nancy Maas									W F	10:00AM	11:25AM		0
BIOL	H338G	Biostatistics Biological research depends on collecting, analyzing, and presenting data. This course will introduce the art of working with data at all stages of the scientific process, including data organization, analysis, and visualization. By analyzing real datasets, we will discuss the logic behind several foundational statistical tests and consider their strengths and limitations. Along the way, we will learn to detect misleading uses of statistics and graphs, and develop proficiency in Excel and R. Pre-requisite(s): BIOL H200A and H201B with a grade of 2.0 or above, or instructor consent Lottery Preference: Biology majors Enrollment Limit: 25.00 Attributes: <i>C: Physical and Natural Processes</i> <i>Natural Science</i> <i>Quantitative</i> 2888 001 .5 Lee Dietterich									M W	10:00AM	11:25AM		0

CHEM	H114B	Intensive: Chemical Dynamics								
An introduction to chemical thermodynamics, equilibrium, electrochemistry and kinetics. Microscopic properties are used to develop basic chemical concepts of energy, enthalpy, entropy, and the Gibbs Energy, and their applications to thermochemistry, equilibria, and electrochemistry. Chemical kinetics, reaction mechanisms, and applications to chemical problems are also discussed. This is a more intensive offering of CHEM 112 designed for students with little or no experience in chemistry.										
Prerequisite(s): CHEM 113 or recommendation of CHEM 111 instructor										
Attributes: Biochemistry and Molecular Biology C: Physical and Natural Processes Natural Science Quantitative

CHEM	H261J	Research Tutorial in Physical Chemistry								
One-half credit course for the year designed for students interested in the chemistry research experience in physical chemistry, condensed phase chemical physics, and biophysical chemistry, with emphasis on spectroscopic studies of peptides and proteins. (Not open to seniors.)										
Prerequisite(s): Instructor consent: interested students should discuss possible enrollment with the instructor.										
Attributes: C: Physical and Natural Processes Natural Science										
	1356	001	.5		Casey H Londergan					0
	2416	002	.5		Samuel Shepard					0

Haverford College Spring 2024 Course Guide

Subject	Cat Nbr	CLNbr	Sctn	Crd	Instructor(s)	Days	Start	End	Room	Enrld
CHEM	H262J				Research Tutorial in Theoretical Chemistry One-half credit course for the year designed for students interested in the chemistry research experience in theoretical physical chemistry, with emphasis on methods for prediction of optical, electronic, and mechanical properties of semiconductor nanostructures. (Not open to seniors.) Prerequisite(s): Instructor consent <i>Attributes: C: Physical and Natural Processes Natural Science</i> 1375 001 .5 Clyde Daly					0
CHEM	H263J				Research Tutorial in Organic Chemistry One-half credit course for the year designed for students interested in the chemistry research experience in synthetic organic chemistry and physical-organic chemistry. Topics include total synthesis of biologically significant molecules, new methods of enantioselective synthesis, and the study of organic reaction mechanisms. (Not open to seniors.) Prerequisite(s): Instructor consent <i>Attributes: C: Physical and Natural Processes Natural Science</i> 1357 001 .5 Theresa D. Gaines					0
CHEM	H265J				Research Tutorial in Bioinorganic Chemistry One-half credit course for the year designed for students interested in the chemistry research experience in spectroscopic and kinetic studies of metalloproteins and inorganic coordination compounds. (Not open to seniors.) This course is graded universal P/F in which no numerical grade is assigned. Prerequisite(s): Instructor consent (requires prior discussion of, and agreement on, type of research to be pursued; this assures that necessary resources will be available and that the student's knowledge of chemistry is sufficient to safely and effectively carry out the research). Interested students should reach out to the instructor to discuss potential enrollment <i>Attributes: C: Physical and Natural Processes Natural Science</i> 1358 001 .5 Robert C. Scarrow					0
CHEM	H267J				Research Tutorial in Biological Chemistry One-half credit course for the year designed for students interested in the chemistry research experience in natural product biosynthesis. (Not open to seniors.) This course is graded universal P/F in which no numerical grade is assigned. Prerequisite(s): Instructor consent 1376 001 .5 Louise Charkoudian 1624 002 .5 Leah Seebald					0 0
CHEM	H268I				Research Tutorial in Environmental Chemistry One-half credit course for the semester designed for students interested in the chemistry research experience in the field of biogeochemistry, a multidisciplinary approach focused at understanding the chemical composition and processes of Earth's biosphere. (Not open to seniors.) Prerequisite(s): Instructor consent <i>Attributes: C: Physical and Natural Processes Natural Science</i> 1564 001 .5 Helen K. White					0
CHEM	H268J				Research Tutorial in Environmental Chemistry One-half credit course for the year designed for students interested in the chemistry research experience in the field of biogeochemistry, a multidisciplinary approach focused at understanding the chemical composition and processes of Earth's biosphere. (Not open to seniors.) Prerequisite(s): Instructor consent <i>Attributes: C: Physical and Natural Processes Natural Science</i> 1359 001 .5 Helen K. White					0
CHEM	H269J				Research Tutorial in Materials Science One-half credit course for the year designed for students interested in the chemistry research experience in the field of biogeochemistry, a multidisciplinary approach focused at understanding the chemical composition and processes of Earth's biosphere. (Not open to seniors.) Prerequisite(s): Instructor consent <i>Attributes: C: Physical and Natural Processes Natural Science</i> 1360 001 .5 Alexander Norquist					0

Subject	Cat Nbr	CLNbr	Sctn	Crd	Instructor(s)	Days	Start	End	Room	Enrld
CHEM	H302B	Lab in Chemical Structure and Reactivity Two lectures and two laboratory periods. An introduction to the methods of research in chemistry. Inorganic, organic, physical chemistry, and biochemical concepts are integrated in a broad laboratory study of structure and its relationship to chemical reactivity. Physical methods are used in studies of organic, inorganic, and biochemical reactions. Chemical synthesis and the modern methods of instrumental analytical chemistry are particularly stressed. Instruments such as lasers, the 500 MHz NMR spectrometer, and the mass spectrometer combined with either gas or liquid chromatography are used by students, with faculty supervision. Prerequisite(s): CHEM H225 and either CHEM H304, or CHEM H305 (which may be taken concurrently) <i>Attributes: Biochemistry and Molecular Biology C: Physical and Natural Processes Natural Science</i>								
	1346	001	1.0		Theresa D. Gaines	T	11:30AM	12:25PM		0
	1347	00A	.0		Theresa D. Gaines	T Th	1:00PM	3:55PM		0
CHEM	H303B	Laboratory in Biochemical Research An introduction to the laboratory concepts and techniques at the chemistry-biology interface including: molecular cloning, protein purification, biophysical spectroscopy, molecular modeling, and biochemical assays. Crosslisted: Chemistry, Biology Prerequisite(s): CHEM H225 Enrollment Limit: 15 Lottery Preference(s): Biochemistry concentrators <i>Attributes: C: Physical and Natural Processes Natural Science</i>								
	1489	001	1.0		Louise Charkoudian	T Th	11:30AM	12:25PM		0
	1490	00A	.0		Louise Charkoudian	T Th	1:00PM	3:55PM		0
CHEM	H305B	Quantum Chemistry Two lectures. The quantum theory of atoms and molecules as applied to problems in molecular structure, computational chemistry, and basic spectroscopic techniques. Emphasis on computer-based solutions and visualization. Prerequisite(s): MATH 121 or 216, or instructor consent <i>Attributes: Biochemistry and Molecular Biology C: Physical and Natural Processes Natural Science Quantitative</i>								
	1348	001	1.0		Samuel Shepard	T Th	8:30AM	9:55AM		0
CHEM	H320G	Concepts of Inorganic Chemistry Three lectures for one-half semester (one-half course credit). An introduction to structure and reactivity of inorganic molecules and materials. Topics include: theories of chemical bonding, symmetries of molecules and solid state materials, acid-base, oxidation-reduction reactions, and structures and nomenclature of coordination complexes. Prerequisite(s): CHEM H225 <i>Attributes: C: Physical and Natural Processes Natural Science</i>								
	1349	001	.5		Samuel Shepard	M W F	9:30AM	10:25AM		0
CHEM	H351H	Bioinorganic Chemistry Three lectures for one-half semester (one-half course credit). Biological cells require metals such as zinc, iron, copper, manganese, and molybdenum; metal-binding abilities of various functional groups within proteins and nucleic acids, metal-based reactivity involved in reaction mechanisms of specific metalloenzymes, and medically-relevant topics such as bioaccumulation and storage of metal ions, the toxicity of heavy metals, and use of metal-containing drugs in treating disease will be discussed. Prerequisite(s): Chem H222 and either CHEM H320 or BIOLH201 <i>Attributes: Biochemistry and Molecular Biology C: Physical and Natural Processes Natural Science</i>								
	1350	001	.5		Domhnall OShaughnessy	M W F	9:30AM	10:25AM		0
CHEM	H352G	Topics in Biophysical Chemistry: Biomolecular Structural Techniques A techniques-based and literature-driven perspective on molecular and physical processes inside cells, including basic bioenergetics and homeostasis, protein folding and energy transfer, dynamic structural organization and non-organelle colocalization (including intracellular liquid-liquid phase transitions), and multiscale simulation techniques. Prerequisite(s): Chem H304 or equivalent (depending on material), or instructor consent. <i>Attributes: Biochemistry and Molecular Biology C: Physical and Natural Processes Natural Science</i>								
	2850	001	.5		Jianjun Wang	M W	2:30PM	3:55PM		0

CHEM	H352H				Topics in Biophysical Chemistry: X-ray Crystallography The specific content of the course varies, depending on faculty and student interests. The course will focus on biophysical chemistry and related topics. Prerequisite(s): Chem H304 or equivalent (depending on material), or instructor consent. <i>Attributes: Biochemistry and Molecular Biology C: Physical and Natural Processes Natural Science</i>					
	2851	001	.5		Margarita Tararina	T	7:00PM	9:55PM		0
CHEM	H359H				Topics in Inorganic Chemistry The specific content of the course varies, depending on faculty and student interests. The course will focus on a specific topic within the realm of Inorganic Chemistry; example topics include electrochemical technology, organometallic catalysis, main group chemistry, and f-block elements. The Spring 2022 topic is organometallic catalysis, and the course will introduce fundamental concepts in organometallic chemistry including different types of organometallic reactions, catalyst development and applications in organic synthesis. Prerequisite(s): CHEM 225 and CHEM 320 <i>Attributes: C: Physical and Natural Processes Natural Science</i>					
	1484	001	.5		Mark A. Hilfiker	M	7:00PM	9:55PM		0
CHEM	H361B				Senior Research Tutorial in Physical Chemistry Directed research in physical chemistry, condensed phase chemical physics, and biophysical chemistry, with emphasis on spectroscopic studies of site-specific environmental and conformational dynamics in peptides and proteins. Prerequisite(s): Instructor consent <i>Attributes: Natural Science</i>					
	1361	001	1.0		Casey H Londergan					0
CHEM	H362B				Senior Research Tutorial in Theoretical Chemistry Directed research in computational and theoretical physical chemistry, with emphasis on development and application of methods for prediction of optical, electronic, and mechanical properties of organic and inorganic semiconductor nanostructures. Prerequisite(s): Instructor consent <i>Attributes: Natural Science</i>					
	1377	001	1.0		Clyde Daly					0
CHEM	H363B				Senior Research Tutorial in Organic Chemistry Directed research in synthetic organic chemistry, and physical-organic chemistry. Topics include total synthesis of biologically significant molecules, new methods of enantioselective synthesis and the study of organic reaction mechanisms. Prerequisite(s): Instructor consent <i>Attributes: Natural Science</i>					
	1362	001	1.0		Theresa D. Gaines					0
CHEM	H365B				Senior Research Tutorial in Bioinorganic Chemistry Directed research in bioinorganic and coordination chemistry. Topics include synthesis and spectroscopic and kinetic studies of inorganic coordination compounds that can aid in understanding the chemistry of metalloproteins. Prerequisite(s): Instructor consent <i>Attributes: Natural Science</i>					
	1363	001	1.0		Robert C. Scarrow					0
CHEM	H367B				Senior Research Tutorial in Biological Chemistry Directed research in organic biological chemistry. Topics include natural product isolation and characterization, investigations into the role of protein-protein interactions in antibiotic biosynthesis, and the elucidation of biosynthetic pathways. Prerequisite(s): Instructor consent <i>Attributes: Natural Science</i>					
	1364	001	1.0		Louise Charkoudian					0
	1627	002	1.0		Leah Seebald					0

CMSC	H104B	Topics in Intro Programming: Physics and Astronomy Topics in Introductory Programming is designed to give a general introduction to programming as related to data analysis across many fields. Students will be introduced to standard introductory programming imperative and object oriented techniques as well as data structures necessary to create efficient and understandable algorithmic solutions to problems. This course satisfies the prerequisite for CMSC 107. Antirequisite(s): Students who have taken a semester of college-level computer science (e.g.,CMSC105) or placed into CMSC107 are ineligible to take this course. It is intended for students with little or no background in computer programming. This course is equivalent to CMSC 104. Enrollment Limit: 24 Lottery Preferences: first years, then sophomores, then all other students. Attributes: C: Physical and Natural Processes Natural Science Quantitative								
		1487	001	.0	Andrea N. Lommen	M W	1:00PM	2:25PM		0

	1486	00B	1.0	TBA	Department staff					0
CMSC	H105B	Introduction to Computer Science								
	Introduction to the intellectual and software tools used to create and study algorithms: formal and informal problem specification; problem solving and algorithm design techniques; reliability, formal verification, testing, and peer code review techniques; program clarity, complexity and efficiency; functional and imperative paradigms; associated programming skills. Students must attend a one-hour weekly lab. Labs will be sectioned by course professor.									
	Prerequisite(s): May not be taken by students who have taken any one of HC: CMSC 104, CMSC 107; BMC: CMSC 110, except by instructor consent									
	Enrollment Limit: 32									
	Lottery Preference(s): 24 spaces reserved for incoming freshmen, then:									
	1) Sophomores									
	2) Senior Scientific Computing concentrators									
	3) Junior CS minors, Junior Scientific Computing concentrators, and Junior CS concentrators									
	4) Others									
	Attributes: C: Physical and Natural Processes Natural Science Quantitative

	2896	00B	1.0	Suzanne Lindell		F	1:30PM	2:25PM	HLS110	0
CMSC	H106B	Introduction to Data Structures								
	An introduction to the fundamental data structures of computer science: strings, lists, stacks, queues, trees, BSTs, graphs, sets and their accompanying algorithms. Principles of algorithmic analysis and object reasoning and design will be introduced using mathematical techniques for the notions of both complexity and correctness. More practical issues, such as memory management and hashing, will also be covered. The programming language used to illustrate and implement these concepts will be able to support functional, imperative and object-oriented approaches. Emphasis will be placed on recursive thinking and its connection to iteration. Students must attend a one-hour weekly lab. Labs will be sectioned by course professor.									
	Prerequisite(s): CMSC 105 (or 110 or 113 at Bryn Mawr) or instructor consent; may not be taken by students who have taken any one of HC: CMSC 104, CMSC 107; BMC: CMSC 206, CMSC 151, except by instructor consent									
	Enrollment Limit: 32									
	Lottery Preference(s): Sophomores then first-years, then Scientific Computing concentrators, then Computer Science minors and concentrators									
	Attributes: C: Physical and Natural Processes Natural Science Quantitative									
	1179	001	.0	Christopher Braun		M W	11:30AM	12:55PM		0

	1178	00C	1.0	Christopher Braun		F	11:30AM	12:25PM		0
CMSC	H222B	Scientific Computing: Continuous Systems								
	A survey of major algorithms in modern scientific computing, with a focus on continuous problems. Topics include numerical differentiation and integration, numerical linear algebra, root-finding, optimization, Monte Carlo methods, and discretization of differential equations. Basic ideas of error analysis are presented. Regular computer work in class introduces students to the software package Matlab, in which the algorithms are implemented and applied to various problems in the natural and social sciences.									
	Crosslisted: Mathematics, Computer Science									
	Prerequisite(s): Math 121									
	Enrollment Limit: 25									
	Attributes: C: Physical and Natural Processes Natural Science Quantitative Scientific Computing									
	2461	001	1.0	Rebecca Everett		M W	1:00PM	2:25PM		0
CMSC	H231B	Discrete Mathematics								
	An introduction to discrete mathematics with strong applications to computer science. Topics include set theory, functions and relations, propositional logic, proof techniques, difference equations, graphs, and trees.

CMSC	H360B	Machine Learning To explore both classical and modern approaches, with an emphasis on theoretical understanding. There will be a significant math component (statistics and probability in particular), as well as a substantial implementation component (as opposed to using high-level libraries). However, during the last part of the course we will use a few modern libraries such as TensorFlow and Keras. By the end of this course, students should be able to form a hypothesis about a dataset of interest, use a variety of methods and approaches to test your hypothesis, and be able to interpret the results to form a meaningful conclusion. We will focus on real-world, publicly available datasets, not generating new data. Prerequisite(s): CMSC 260, or CMSC 325, or instructor consent Enrollment Limit: 24 Lottery Preference(s): Seniors CS majors; Junior CS majors; CS minors; Scientific Computing concentrators; Seniors; Juniors; Sophomores <i>Attributes: C: Physical and Natural Processes Data Science Natural Science Quantitative Scientific Computing</i>

CNSE	H202B	Advanced Chinese: History and Historiography								
		The courses in the "Advanced Chinese" series are the culmination of language training in the Bi-college Chinese program. Students can repeat such courses in the series with different topics. Students are expected to be proactive and independent learners to advance their Chinese competency in speaking, listening, reading, and writing under close supervision of the instructor.								
		Prerequisite(s): Third year Chinese or instructor consent								
		Attributes: A: <i>Meaning, Interpretation (Texts)</i> East Asian Languages and Cultures Humanities								
		1389	001	1.0	Shizhe Huang	T Th	10:00AM	11:25AM		0
COML	H222B	Rethinking Latin America in Contemporary Narrative								
		An examination of literary texts, cultural production and practices that address issues of coloniality, subalternity, gender violence, forced disappearance and displacement, among others. This course explores how the concept of "nation" has marginalised different identities (Indigenous people, women, LGBTQ+), how they have become targets of violence, and what are the connections between coloniality, racism, and forced disappearance as a current practice. However, this course highlights community practices of resilience and agency. For example: radical change from Indigeneity literary works to decolonial Indigenous movements, from genocide to testimonials and Commission of Truth, from forced disappearance to national search brigades and caravans of mothers looking for their beloved ones. This course is conducted in Spanish.								
		Crosslisted: Spanish, Comparative Literature.

COML	H257B	Antigone's Echoes: Activism and the Law from Ancient Greece to today								
		Where should the law come from, the individual or the state? How can you protest an unjust system, and how can an ancient story help you do it? Who owns a "Classic"? These are just a few questions that Sophocles' Antigone has raised for philosophers and playwrights from the Enlightenment to today. We'll read several versions of the Antigone myth and explore this character's enduring relevance to theories of gender, performance, world literature, and politics.								
		Crosslisted: COML, PEAC.								
		Enrollment Limit: 25.00

COML	H312B	Adv Topics French Lit: Machines à penser de Descartes à nous-mêmes								
		Have you ever wondered whether machines can think? This course explores the question by uncovering the contested origins of mechanical culture in early-modern France. We will study the inventions of calculating and thinking machines by Descartes and Pascal, as well as their appropriations and critiques by Madame de Lafayette and Molière. We will then use our findings to reassess the significance of subsequent inventions such as artificial intelligence, cognitive science,

EALC	H126B	Global Asian Diasporas								
		This course examines the modern histories, politics, and cultures of Asian migration and diasporas, with a focus on American contexts. Between 1840 and 1940, Asian migrants—numbering in the tens of millions—set out in search of livelihoods and fortunes, especially in Southeast Asia and the Americas. We will look at how patterns of Asian migrations were propelled by and shaped world-historical dynamics including colonialism, globalization, racial formation, and the most contentious wars of the twentieth century.								
		Crosslisted: EALC.

Subject	Cat Nbr	CLNbr	Sctn	Crd	Instructor(s)	Days	Start	End	Room	Enrld
ECON	H245B				Topics in Finance: Asset and Speculative Markets This course provides an introduction to topics in financial economics, including asset markets. The prerequisite is Econ 104 or 105 2807 001 1.0					0
ECON	H247B				Financial Accounting An introduction to financial accounting concepts, financial reporting, and managerial accounting. The course will address how accounting measures, records, and reports economic activities for business entities and how decision makers analyze, interpret, and use accounting information. COURSE MAY NOT BE USED TOWARDS THE ECONOMICS MAJOR or MINOR AT HAVERFORD. Crosslisted: Economics, Independent College Programs <i>Attributes: B: Analysis of the Social World Social Science</i> 1333 001 1.0 Neal Grabell	M	7:30PM	9:55PM		0
ECON	H255B				Crises This course will study the many dimensions of the 2008 Financial Crisis, and the ensuing macroeconomic recession in much of the industrialized world, through a variety of different perspectives, involving economic history, the history of economic thought, and also modern macroeconomic theory. Prerequisite(s): ECON 104, 105, or 106 <i>Attributes: B: Analysis of the Social World Social Science</i> 2545 001 1.0 Timothy Lambie-Hanson	M W	11:30AM	12:55PM		0
ECON	H302B				Intermediate Macroeconomic Analysis Analysis of the behavior of aggregate economic variables such as GDP, inflation, unemployment, interest rates, and the budget and trade deficits. Structured around the development of a New Keynesian/Neoclassical general equilibrium model which relates the markets for goods, money, and labor. Specific topics include: determinants of the business cycle, effects of fiscal and monetary policies, supply shocks, inflationary expectations. Prerequisite(s): ECON 201 <i>Attributes: B: Analysis of the Social World Social Science</i> 2424 001 1.0 Wei Qian	M W	10:00AM	11:25AM		0
ECON	H306B				Advanced Corporate Finance This course examines theories and practices of corporate finance and how they have informed each other in their development. The focus is on financing at the firm level. Topics include valuation and risk measures both at the level of individual securities and the level of firms, project analysis, cost of capital, capital budgeting, and financial statement analysis. Prerequisite(s): Econ 203 or 204 or Math 203 or SOCL 215, PSYCH 200, or Bryn Mawr's Econ B253; Econ 300 or Econ B200 at Bryn Mawr; Econ 302 or Econ B202 at Bryn Mawr. Math 118 (or equivalent of 2 semesters of college calculus) <i>Attributes: B: Analysis of the Social World Social Science</i> 2423 001 1.0 Shannon B. Mudd	T Th	2:30PM	3:55PM		0
ECON	H307B				Money and Banking This course will focus on the basic features of asset market equilibria, the role that both money and financial intermediation play in facilitating the allocation of resources, the consequences of failure and policies available to the regulators and the Central Bank. Finally, we will discuss the impact of the evolution in payment systems and financial technology on the financial market and consequences for policy. Course not open to anyone who has already taken ECON207 at either Haverford or Bryn Mawr Prerequisite(s): Econ 302 and Econ 203 or 204 or Math 203. <i>Attributes: B: Analysis of the Social World Social Science</i> 2597 001 1.0 Alberto Arredondo-Chavez	M W	11:30AM	12:55PM		0
ECON	H360B				Mathematical Economics A study of advanced mathematical tools used in economic analysis. Topics include eigenvalues and quadratic forms, differential equations, convex programming and dynamic programming. Applications to consumer theory, generalized linear regression, stability of equilibrium, and models of growth and search. Fulfills Mathematic Economics (MTEC) concentration. Crosslisted: Economics, Mathematics

EDUC	H266B	Geographies of School and Learning: Urban Education Reconsidered								
	This course examines issues, challenges, and possibilities of urban education in contemporary America. We use as critical lenses issues of race, class, and culture; urban learners, teachers, and school systems; and restructuring and reform. While we look at urban education nationally over several decades, we use Philadelphia as a focal "case" that students investigate through documents and school placements. Fieldwork is required.									
	Prerequisite(s): EDUC 200 or instructor consent

ENGL	H298J				Junior Seminar I					
					Junior seminar comprises of a two part sequence that, through class readings, discussion, and writing tutorials, engage students in a study of (1) a series of texts representing the range and diversity of the historical tradition in British and American literature, and (2) critical theory and practice as it has been influenced by hermeneutics, feminism, psychology, semiology, sociology, and the study of cultural representation, and as it reflects the methods of literary criticism. Attributes: Humanities					
		1521	001	.5	TBA Department staff					0
ENGL	H299B				Junior Seminar II					
					Part II of the sequence focuses on narrative and its theorization and criticism. Readings include George Eliot's Middlemarch, stories by Henry James and Edgar Allan Poe, and James Joyce's Ulysses. Prerequisite(s): ENGL 298 or instructor consent Enrollment Limit: 17 Attributes: Humanities					
		1396	001	1.0	Kimberly Benston	T Th	10:00AM	11:25AM		0
		2593	002	1.0	Maud B McInerney	T Th	10:00AM	11:25AM		0
ENGL	H358B				History and/in Fiction					
					A sustained inquiry into the political and aesthetic horizons of historical fiction, this advanced seminar studies British historical novels from the twenty- and twenty-first centuries. Exploring a wide array of imagined pasts—from early modern England to the First World War, among others—we will pay particular attention to how texts conjure and contest national myth-making. Alongside our close readings of individual texts we will consider the fate and fluctuating prestige of the historical novel more broadly.					
		2282	001	1.0	Alexander Millen	F	11:00AM	1:25PM		0
ENGL	H361B				Topics in African-American Lit: Representations of American Slavery					
					For the past three centuries African American writers have mined the experience of chattel slavery in the cause of literal and artistic emancipation. Slave narratives, as well as poetry, essays and novels depicting slavery, constitute a literary universe so robust that the term subgenre does it injustice. In this work spanning the 18th-21st centuries, the reader will find pulse-quickenning plots, gruesome horror, tender sentiment, heroism, degradation, sexual violation and redemption, as well as resonant meditations on language and literacy, racial identity, power, psychology, democracy, freedom and the human character. This course is focused primarily on prose representations of slavery in the Americas. Our discussions will incorporate history, but will foreground literary and cultural analysis. Attributes: A: Meaning, Interpretation (Texts) Africana Studies Humanities Visual Studies					
		2283	001	1.0	Asali Solomon	W	1:30PM	3:55PM		0
ENGL	H362B				Topics in American Literature: Writing about Other People					
					A seminar on the literary portrait, examining mostly non-fiction by Anglo-American and African American writers from the late 19th century to the present. Topics include the erotics of portraiture, portraiture and the archive, portraiture and personal/historical trauma, collective portraiture, satire/critique, data portraits, modernist/post-modernist portraiture. We'll frequently refer to visual forms of portraiture, including painting, photography, video art, and cinema. Regular writing assignments will include our own experiments in writing about others. Attributes: A: Meaning, Interpretation (Texts) Gender and Sexuality Studies Humanities					
		2284	001	1.0	Gustavus T. Stadler	M	1:30PM	3:55PM		0

ENVS	H101B	Case Studies in Environmental Issues: Concepts, Contexts, & Conundrums								
	The course offers a cross-disciplinary introduction to environmental studies. Tracing an arc from historical analysis to practical engagement, distinctive approaches to key categories of environmental inquiry are presented: political ecology, earth science, energy, economics, public health, ecological design, sustainability, policy, and environmental ethics. Basic concepts, such as thermodynamics, biodiversity, cost-benefit analysis, scale, modernization, enclosure, the commons, and situational ethics, are variously defined and employed within specific explorations of environmental challenges in the modern world.									
	Prerequisite(s): Not open to students who have taken ENVS 101 at Bryn Mawr or Swarthmore									
	Enrollment Limit: 40									
	Lottery Preference(s): Junior minors in ENVS; Sophomores; 5 spaces for Frosh									
	Attributes: A: Meaning, Interpretation (Texts) B: Analysis of the Social World C: Physical and Natural Processes Environmental Studies									
		2556	001	1.0	Talia Young	T Th	10:00AM	11:25AM		0
ENVS	H278B	The Earth: Ethics, Politics, and Economics								
	How should we deal with clashes among environmental values, economic growth, and what people want? Examines the clashing theories and interpretations of facts that underlie current environmental debates. Focus on climate change and inter-relations among ethical, political, and economic concerns.									
	Enrollment Limit: 25									
	Attributes: B: Analysis of the Social World Social Science

FREN	H102B	Introduction à l'analyse littéraire The goal of this course, the sequel to French 101, is to continue to develop your powers of expression and analysis in French. A difference between French 102 and 105 (the other sequel to 101) is that here the objects of study will be literary, and that through them we will consider what the value of studying literature is. In French and Francophone cultures, literature has an important and volatile relation to the question of civilization. The relation is important because literature has been used to define and to instill a sense of civility, that is, what it takes for people to live peacefully with one another. On the other hand, the relation is volatile because people disagree about literature's role in defining civility as well as about how to define civility (and therefore civilization) itself. We will explore these fundamental issues in French and Francophone cultures through texts and films of diverse periods, genres, and origins. Authors and artists will include Marivaux, Abdellatif Kechiche, Jean de La Fontaine, Victor Hugo, Françoise de Graffigny, Michel de Montaigne, and Patrick Chamoiseau.

FREN	H250B	Introduction à la Littérature Francophone: Ecritures/Fictions de soi francophones								
Writing, reflecting, about one's life necessarily involves writing about others. How do contemporary Francophone writers and filmmakers understand and express the inter-relational nature of selfhood, identity, and community? In this course we will study a representative sample of Francophone literary and filmic texts in light of current perspectives on postcolonial autobiographical narratives. Possible writers and filmmakers may include Al Malik, Begag, Bouraoui, Bugul, Chamoiseau, Feraoun, Kane, Peck, Pineau and Rahmani.

FREN	H312B	Adv Topics French Lit: Machines à penser de Descartes à nous-mêmes								
Have you ever wondered whether machines can think? This course explores the question by uncovering the contested origins of mechanical culture in early-modern France. We will study the inventions of calculating and thinking machines by Descartes and Pascal, as well as their appropriations and critiques by Madame de Lafayette and Molière. We will then use our findings to reassess the significance of subsequent inventions such as artificial intelligence, cognitive science, machine learning, and chatbots. Readings (as well as those mentioned above) may include works by Epicurus, Euclid, Lucy Hutchinson, La Fontaine, Madame du Châtelet, Diderot, La Mettrie, Alan Turing, Grace Hopper, and OpenAI. .

GERM	H399B	Senior Conference								
	All of our majors are required to write a senior thesis in German, or—if they are double majors—to produce a thesis in a related discipline that has significant overlap with their work in German. They typically take a 300-level seminar in fall and write a research term paper which often becomes the foundation for their senior project. In the spring semester they take the mandatory senior conference consisting of weekly meetings and discussions of thesis proposals and drafts with their advisor(s). In writing the senior thesis, the student should demonstrate a) the capacity to conceive a theoretically informed and well designed research project b) the language skills to research and evaluate primary and secondary materials and to effectively synthesize these, and c) the analytical and methodological skills to produce an innovative and critically astute thesis.									
	Attributes: Humanities

GREK	H001B	Elementary Greek								
	This two-semester course provides an introduction to the ancient Greek language and to the reading of ancient Greek literature; from the beginning we will be reading not only sentences designed to give students practice but actual excerpts from ancient prose and poetry. We should be able to finish the basics by about the middle of the spring semester, and will spend the rest of the year reading and discussing Plato's Crito, in which Socrates defends his decision not to escape from prison and a death sentence, and Lysias' first oration, a speech for the defense in a trial that sheds interesting light on Athenian domestic life.

	1153	001	1.0	Matthew Cullen Farmer		M W F	11:30AM	12:25PM		0
GREK	H202B	Advanced Greek: Tragedy								
	In this course we read two of the surviving works of fifth century Greek tragedy, with selected critical essays and background reading in other plays. Class time will be divided between translation and discussion, with attention not only to themes specific to each tragedy but also to such common topics as: the playwright's treatment of the inherited myth; the way in which the drama tells its story; the role and nature of the chorus; characterization and the connections between characters; the relationship of divine and human; the role of prophecy; choice, justice and retribution; political resonances and the role of gender; performance issues; and the language of dialogue and of choral ode. Class will also include practice reading aloud in the meter of dialogue and in some of the simpler choral meters and discussion of different translations of selected passages. Prerequisite(s): Two Greek courses at the 100 level or above, or instructor consent.

HIST	H203B				The Age of Jefferson and Jackson, 1789- 1850 This course charts the transformation in American political institutions, economy, and society from the ratification of the Constitution to the eve of the Civil War. Often identified as the crucial period when the American nation cohered around a national culture and economy, this period also witnessed profound social rifts over the political legacy of the American Revolution, the national institutionalization of slavery, and the rise of a new class system. We will consider the points of conflict and cohesion in this rapidly changing American nation. <i>Attributes: A: Meaning, Interpretation (Texts) B: Analysis of the Social World Social Science</i> 2326 001 1.0 Bethel A. Saler	T Th	2:30PM	3:55PM		0
HIST	H208B				Decolonizing Colonial Latin American and Caribbean History Can we imagine a “decolonial” history of colonial Latin America and the Caribbean? This course invites you to try. “Decolonization” requires us to acknowledge, work through and overcome the structures of power and privilege originating in the colonial experience itself. To do so one must analyze history, historiography (the writing of history) and non-written historical sources across varied time frames and vast geographic expanses, while also grasping the nuances of specific local histories. In Latin America, Spanish and Portuguese rule of the region lasted more than three centuries--in most countries from 1492 until the early 1820s, and in Cuba and Puerto Rico until 1898--and the legacies of colonial rule have conditioned social relations, economic life, culture, and political conflict into our twenty first century. The Caribbean (“Iberian” and non “Iberian”) presents an even more complex tapestry, with a diverse array of colonial, as well as neo- and post-colonial political arrangements mediating at times fierce struggles for local autonomy and self-determination, from the sixteenth century up until the present. This course challenges us to think in new ways about past and present as it engages history and theory, the local and the global, and place and space.

HIST	H258B	Plagues, Diseases, and Epidemics in History COVID joins a long list of epidemics that have terrified people, upended our comfortable existence, and been the source of fundamental disagreements (about cause, treatment, and reality). This course examines the theories and strategies that people developed to explain the advent and spread of individual plagues. Outbreaks of the Black Death, the French Disease (syphilis ?), various fevers, and deadly diseases provide opportunities to examine how societies understand, categorize diseases, and attempt to control. Enrollment limit: 25 <i>Attributes: Social Science</i>

HIST	H316B	East Asia's Cold War Far beyond a time of geopolitical tensions between the United States and the Soviet Union, the Cold War was a global phenomenon with many violent battlegrounds. This course examines East Asian histories of the "long Cold War," from 1945 to the present, with a focus on China, Japan, Korea, and Vietnam. We will read East Asia's Cold War—through scholarship, film, and literature—as a struggle for national redefinition and cultural renewal in the aftermath of empire. Crosslisted: EALC. Enrollment Limit: 15.00 <i>Attributes: B: Analysis of the Social World Social Science</i> 2611 001 1.0 Ruodi Duan M 1:30PM 3:55PM 0								
HIST	H317B	Topics in Latin American Hist:Religion, Power, and Politics in Latin America and the Caribbean This seminar analyzes the connections between religion, power, and politics in contemporary Latin America and the Caribbean. While the emphasis in our readings will be on varied forms of elite and popular Christianity, we shall discuss a range of religious experiences and traditions. Students will also be encouraged to pursue research topics of their own design. Topics to be considered include polemics concerning enlightenment rationality, secularism, atheism, agnosticism, and the persistence of religious belief in our contemporary world; right and left-wing "faith-based" political models in Latin America; the emergence of Liberation Theology and its intersection with resistance, rebellion, and revolution on the popular level; Afro-Atlantic spiritual beliefs and practices, and the history of Christian socialism and social reform. <i>Attributes: A: Meaning, Interpretation (Texts) B: Analysis of the Social World Latin American, Iberian, and Latinx Studies Social Science Visual Studies</i> 1499 001 1.0 James Krippner F 1:30PM 3:55PM 0								
HIST	H333B	History and Fiction:Call Me Ishmael: Early American Encounters with Islam This course introduces students to some of the cultural theories that have influenced the recent work of historians as well as examples of historical monographs that take a theoretical approach. It highlights imaginative & innovative approaches to history rather than a particular geographic or chronological period. Among the cultural theorists whose work we will examine will include Michel Foucault, Clifford Geertz, Pierre Bourdieu, Edward Said, and Dipesh Chakrabarty. <i>Attributes: B: Analysis of the Social World Social Science</i> 2565 001 1.0 Bethel A. HLTH	H219B	Breathing Together: Air, Capitalism, and Health								
		This course explores the history of public health approaches to the properties, pathogenic potential, and politics of shared air. We ask what it means to breathe together—as humans in a global economic system—at multiple scales, from interpersonal to institutional, industrial, and imperial. Topics include miasma, tuberculosis, industrial pollution, occupational health and gendered labor, household fuels, secondhand smoke, incinerators, megacities. Texts are drawn from history, public health, science and technology studies, geography, and anthropology.								
		Pre-requisite(s): HLTH H/B115, a health-related writing seminar, or at least one course in the humanities or social sciences								
		Lottery Preference: In descending order: 1. declared Health Studies minors 2. Sophomores 3. Anthropology majors and minors

<p>This class examines the complex connections between food, understandings of health, and social justice. The availability of sufficient, appealing, and healthy food is critical for human wellbeing, but what constitutes good food and what it means to thrive are each significantly shaped by social, cultural, and historical context. This class takes an interdisciplinary approach to situate food and health in their social and cultural contexts.</p> <p>Pre-requisite(s): HLTH 115 or instructor consent</p> <p>Lottery Preference: 1) declared health studies minors, 2) sophomores</p> <p>Enrollment Limit: 25.00</p> <p>Attributes: B: Analysis of the Social World Health Studies Social Science</p> <p>2639 001 1.0 Damien Droney T Th 10:00AM 11:25AM 0</p>										
HLTH	H265B	<p>Medical Anthropology</p> <p>What does it mean to attempt a critical anthropology of the body, illness experience, disease etiology, healing practices, and the epistemology of contemporary biomedicine across a diverse group of cultures and traditions? This course seeks to begin to answer this and other questions by examining the historical development of the field of medical anthropology, exploring the theoretical and philosophical underpinnings of the debates that have shaped the field, and examining the methodological concerns and ethnographic investigations that have broadened the scope of its inquiry. Readings range from classical ethnographic writings, philosophical treatises, anthropological theory, indigenous philosophers, and first person accounts of illness and health.</p> <p>Enrollment Limit: 25</p> <p>Lottery Preference(s): 1.) Health Studies minors 2.) Anthropology majors and minors</p> <p>Attributes: B: Analysis of the Social World Health Studies Humanities</p> <p>1779 001 1.0 Michael D'Arcy T Th 1:00PM 2:25PM 0</p>

Depending on Covid guidelines the course may Includes a semester-long project in partnership with the Center for Creative Works, a community artspace for artists with intellectual disabilities.</p> <p>Enrollment Limit: 15</p> <p>Lottery Preference: Health Studies seniors</p> <p>Attributes: A: Meaning, Interpretation (Texts) Health Studies Humanities Visual Studies</p> <p>1419 001 1.0 Kristin Anne Lindgren T Th 2:30PM 3:55PM 0</p>								
HLTH	H316B	<p>Making and Mistaking Race in American Medicine</p> <p>This course examines the origins and development of American medical and scientific thinking about race. Drawing on histories of medicine, critical race theory, science and technology studies, sociology, and medical anthropology, we trouble the idea of race-as-biological-difference and explore the social construction of (pseudo)scientific knowledge about race, bodies, genes, and health. Students learn to historicize genomic and post-genomic discourses of racial difference, and develop communication strategies for confronting racial essentialism in medicine and public discourse.</p> <p>Pre-requisite(s): HLTH H115 or a 100-level course in Anthropology, Sociology, or History</p> <p>Lottery Preference: Senior Health Studies minors Junior Health Studies minors Africana Studies minors and concentrators</p> <p>Anthropology majors and minors</p> <p>Enrollment Limit: 15</p> <p>Attributes: Africana Studies B: Analysis of the Social World Health Studies Social Science</p> <p>2605 001 1.0 Anna M West T Th 10:00AM 11:25AM 0</p>								
HLTH	H319B	<p>Metabolic Disorders</p> <p>Life and death are animated by metabolism – the biochemical conversion of gases and matter into energy, and the reverse. We learn the current biochemistry of metabolism, and how social scientists draw upon scientific models of metabolism to explain how societies power production and exchange in ways that generate collective life, growth, disease and death. We then study pandemics of “metabolic disorders”, including diabetes, cardiac disease, cancer, IBD, autism, ADHD, schizophrenia, Alzheimer’s, Parkinson’s and infertility.</p> <p>Pre-requisite(s): HLTH H115 or at least one course in the humanities or social sciences</p>

ITAL	H002B_	Beginning Italian II								

Haverford College Spring 2024 Course Guide

Subject	Cat Nbr	CLNbr	Sctn	Crđ	Instructor(s)	Days	Start	End	Room	Enrld
<p>This course is the continuation of ITAL001 and is intended for students who started studying Italian the semester before. It aims at making students be able to: (1) speak and write in Italian at an elementary level; (2) effectively communicate with other Italian-speaking people by giving advice, expressing desires, and sharing their opinions; (3) produce authentic works in Italian such as audio messages, social media posts, songs, etc.; (4) understand and comment on aspects of Italian culture in the target language; (5) refine intercultural communication skills.</p> <p>Classes are student-centered and designed to foster students' language skills, keeping in mind their different ways of learning. ITAL002 is based on five weekly 50 minute-sessions: four sessions with the instructor and one with a TA, to work on written and oral assignments and hone language communicative skills. This course promotes diversity, equity, and inclusion by adopting a free OER textbook.</p> <p>Prerequisites: ITAL001 or placement.</p> <p>Attributes: A: <i>Meaning, Interpretation (Texts)</i> <i>Humanities</i></p>

LATN	H104B	Introduction to Latin Literature: Friends and Enemies of Rome								
		This is both an intermediate Latin course and an introduction to the study of Latin literature and culture. Readings will span a range of works in prose and poetry, including inscriptions and other material evidence for Roman culture. The focus of inquiry will be on understanding Roman identity—their hopes, fears, achievements, and follies—by studying how they described friendship and their friends, and those enemies who resisted the Roman order, from the founding of the city, through its near destruction by Hannibal, and its cannibalization during the Civil Wars. The course will conclude with a brief historical simulation in which you will debate the fate of Rome as a Roman senator.								
		Prerequisite(s): LATN 102 or equivalent, or instructor consent								
		<i>Attributes: A: Meaning, Interpretation (Texts) Humanities</i>								
		1155	001	1.0	Ryan Warwick	T Th	10:00AM	11:25AM		0
LATN	H206B	Advanced Latin Literature: Postclassical Latin								
		An investigation of one or more historical, cultural, or literary questions drawn from the 95% of Latin literature that was produced after Classical antiquity. We will read a variety of texts, in different genres and from various times. Recent topics have included: centonic literature, the epistolary exchange between Abelard and Heloise, the Latin of New Spain, and Philadelphia Latin.								
		Prerequisite(s): Two semesters of 100-level Latin, or instructor consent								
		Enrollment Limit: 25

LING	H115B	Phonetics and Phonology								
		This course investigates the sound patterns found in human languages. Phonetics is the study of these patterns from a physical and perceptual perspective while phonology is the study of sound patterns from a cognitive perspective. Activities in the class will expose students to the methodologies used by both perspectives (articulatory description and acoustic analysis for phonetics and formal theoretical models for phonology) and show the necessity and utility of both approaches in understanding the nature of sound patterns in human language.								
		Enrollment Limit: 25

					Lottery Preference(s): (1) Sr. Ling Majors (2) Jr. Ling Majors (3) Sr. Ling Minors (4) Jr. Ling Minors (5) Neuroscience minors (6) sophomores (7) first years (8) everyone else (jrs/seniors) <i>Attributes: B: Analysis of the Social World Humanities Symbolic Reasoning</i> 1423 001 1.0 Noah Elkins	M W	10:00AM	11:25AM		0
LING	H204B				Topics in Introductory Programming: Language and Computation A general introduction to computer programming, in the context of its application to a specific discipline such as Data Analysis or Bioinformatics. Prerequisite for CMSC 107, along with discipline-specific analysis. Not for students who have completed CMSC 105 and/or 107. This course is equivalent to CMSC 104. Prerequisite(s): LING H101, H113, or H115 Enrollment Limit: 24 Lottery Preference(s): Linguistics majors and minors <i>Attributes: C: Physical and Natural Processes Natural Science Quantitative Symbolic Reasoning</i> 2269 001 1.0 Jane Chandlee 2852 00A .0 Suzanne Lindell 2853 00B .0 Suzanne Lindell	M W W Th	2:30PM 9:00AM 1:00PM	3:55PM 9:55AM 1:55PM		0 0 0
LING	H216B				The Structure of Mam Mam is a Mamean-branch Mayan language spoken predominantly in Guatemala, although smaller communities exist in Mexico and the United States. In this course, we examine Mam in depth, covering topics from phonetics, phonology, morphology, syntax, semantics, dialectal variation, and sociolinguistics. This course will afford students the opportunity to study a non-Indo-European language systematically while contributing to research on this underdocumented language. Pre-requisite(s): (LING H113 OR LING B113 OR LING S050) AND (LING 101 OR LING 114 OR LING 115 OR instructor permission) Enrollment Limit: 15.00 <i>Attributes: B: Analysis of the Social World Social Science</i> 2891 001 1.0 Noah Elkins	Th	1:30PM	3:55PM		0
LING	H282B				Structure of Chinese This course is designed to acquaint students with both the syntactic and semantic structures of Mandarin Chinese and the theoretical implications they pose to the study of natural language. Students will have an opportunity to further their understanding of linguistic theories and to develop skills in analyzing a non-Indo-European language systematically. Enrollment Limit: 16 Prerequisite(s): At least two of the following: LING 101, 113, 114, or consent of the instructor. Priority to seniors and juniors. (Knowledge of Chinese is NOT required.) <i>Attributes: A: Meaning, Interpretation (Texts) B: Analysis of the Social World Social Science</i> 1424 001 1.0 Shizhe Huang	F	1:30PM	3:55PM		0
LING	H295B				Seminar in Syntax A course designed to both provide theoretical and empirical breadth in advanced topics not covered in the introductory syntax courses, as well as introduce students to new ideas and recent developments in the field. Topics vary from semester to semester. Prerequisite(s): LING H113 or LING S050 <i>Attributes: A: Meaning, Interpretation (Texts) Humanities</i> 2674 001 1.0 Amanda Payne	T	1:30PM	3:55PM		0
LING	H399B				Senior Thesis Seminar

<p>This seminar exposes students to linguistic research methods and guides them through the conceptualization of a topic, the research, and the writing of a senior thesis. All linguistics majors must write their senior thesis in this seminar or Ling S100 or S195. Enrollment limited to 15 students, Senior linguistics majors only.</p> <p><i>Attributes: A: Meaning, Interpretation (Texts) B: Analysis of the Social World Humanities</i></p>										
		1425	001	1.0	Jane Chandlee	F	1:30PM	3:55PM		0
MATH	H103B	Introduction to Probability and Statistics Basic concepts and methods of elementary probability and quantitative reasoning, with practical applications. Topics include: sample average and standard deviation, normal curves, regression, expected value and standard error, confidence intervals and hypothesis tests. Crosslisted: Mathematics, Statistics Prerequisite(s): Not open to students who have (a) placed into 121 or higher, (b) taken 118 or higher, (c) taken any other introductory statistics class at Haverford or Bryn Mawr, (d) received a score of 4 or 5 on the AP Statistics exam Enrollment Limit: 30 <i>Attributes: C: Physical and Natural Processes Natural Science Quantitative</i>								
		2458	001	1.0	David Lippel	M W	1:00PM	2:25PM		0
MATH	H118B	Calculus: Dynamics and Integration A study of the evolution of systems defined by difference and differential equations. Methods of analysis come from calculus: the limit, the derivative, and the integral from numerical, graphical, and symbolic perspectives. Not open to students placing into Math 121 or higher, except with instructor permission. Prerequisite(s): MATH 105 or placement. Not open to students with credit for MATH B102 (Calculus II) or equivalent, except with instructor consent Enrollment Limit: 24 <i>Attributes: C: Physical and Natural Processes Natural Science Quantitative</i>								
		1649	001	1.0	Anthony Kling	M W	10:00AM	11:25AM		0
		1650	002	1.0	Anthony Kling	M W	11:30AM	12:55PM		0
MATH	H121B	Multivariable Calculus An introduction to functions of several variables, vector geometry, partial derivatives, optimization, Taylor's Theorem, multiple integrals, line integrals, and Green's and Stokes' Theorems. Prerequisite(s): MATH 118 or equivalent placement, or instructor consent. Not open to students who have previously taken multivariable calculus at the college level, either at Haverford or elsewhere, except with instructor consent. Enrollment Limit: 24 <i>Attributes: Biophysics C: Physical and Natural Processes Natural Science Quantitative</i>								
		1434	001	1.0	Tianyuan Xu	M W F	9:30AM	10:25AM		0

		2464	001	.5	Elizabeth Townsend Milicevic	M	2:30PM	3:55PM		0
MATH	H203B	Statistical Methods and their Applications An introduction to statistical methods used to analyze data in the natural and social sciences. It covers descriptive statistics, the binomial and normal distributions, expected value and variance, confidence intervals and hypothesis testing, comparison of two samples, regression, and analysis of variance. A required computer lab, using R, is taught alongside this course. Crosslisted: Mathematics, Statistics Prerequisite(s): MATH 118 or higher, placement into MATH 121 or higher, or instructor. consent. Students who have taken another introductory statistics course at Haverford or Bryn Mawr may only enroll in STAT 203 with instructor consent Enrollment Limit: 20 Attributes: C: Physical and Natural Processes Natural Science Quantitative								
		1436	001	1.0	Lynne M. Butler	M W	11:30AM	12:55PM		0
		1447	00A	.0	Lynne M. Butler	F	11:30AM	12:55PM		0
MATH	H204B	Differential Equations An introduction to the theory of ordinary differential equations (ODEs) including algebraic techniques for solving a single ODE or a linear system of ODEs, numerical techniques for generating approximate solutions, geometric techniques for displaying solutions to understand their behavior, analyzing nonlinear systems, and some key theorems (such as existence and uniqueness of solutions). The focus of this course will be on applications of the methods and solving real systems. Prerequisite(s): MATH 121 or MATH 215 (or 216) or consent of instructor. Enrollment Limit: 25 Attributes: C: Physical and Natural Processes Natural Science Quantitative								
		2465	001	1.0	Rebecca Everett	M W	10:00AM	11:25AM		0
MATH	H215B	Linear Algebra An abstract introduction to linear algebra, focusing on proof techniques. Topics covered include: vector spaces, linear transformations and matrices, determinants, eigenvalue problems, quadratic forms, and the spectral theorem. Prerequisite(s): MATH 121 or equivalent placement, or 118 with instructor consent, or CMSC 231 Enrollment Limit: 30 Attributes: C: Physical and Natural Processes Natural Science Quantitative								
		1437	001	1.0	Mehdi Abdi Anbouhi	M W F	8:30AM	9:25AM		0

		2480	00B	.0	Mehdi Abdi Anbouhi	Th	10:00AM	10:55AM		0
MATH	H216B	Multivariable Calc using Linear Algebra Calculus in n-dimensional Euclidean space: continuous and differentiable functions, extreme value problems, multiple integration, line and surface integrals, parametrized surfaces, Green's, Gauss' and Stokes' Theorems. Tools from linear algebra are used to formulate general statements of definitions, theorems and proofs. Prerequisite(s): Not open to students who have previously taken multivariable calculus at the college level, either at Haverford or elsewhere, except with instructor permission. Requires a strong background in single-variable calculus and a course in linear algebra, or instructor consent Enrollment limit: 25 Attributes: Biophysics C: Physical and Natural Processes Natural Science Quantitative								
		1736	001	1.0	Joshua Sabloff	M W F	10:30AM	11:25AM		0
MATH	H222B	Scientific Computing: Continuous Systems A survey of major algorithms in modern scientific computing, with a focus on continuous problems. Topics include numerical differentiation and integration, numerical linear algebra, root-finding, optimization, Monte Carlo methods, and discretization of differential equations. Basic ideas of error analysis are presented. Regular computer work in class introduces students to the software package Matlab, in which the algorithms are implemented and applied to various problems in the natural and social sciences. Crosslisted: Mathematics, Computer Science

Haverford College Spring 2024 Course Guide

Subject	Cat Nbr	CLNbr	Sctn	Crd	Instructor(s)	Days	Start	End	Room	Enrld
<p>Chorale is a large mixed chorus that performs major works from the oratorio repertoire with orchestra and student soloists. Attendance at weekly two-hour rehearsals and dress rehearsals during performance week is required. Entrance by audition. Students can start Chorale at the beginning of any semester. This course is graded universal P/F in which no numerical grade is assigned.</p> <p>Prerequisite(s): Audition and consent of the instructor.</p> <p>Attributes: Humanities</p>										
		1268	001	.5	Scott AuCoin	W	7:00PM	9:15PM	ROB100	0
MUSC	H110B	<p>Introduction to Music Theory</p> <p>An intensive introduction to the notational and theoretical materials of music, complemented by work in sight-singing, keyboard harmony, and dictation. This course is appropriate for students who sing or play an instrument, but who have had little or no systematic instruction in music theory. Topics include time and pitch and their notation, scales, intervals, triads, basic harmonic progressions, melodic construction, harmonization of melody, non-harmonic tones, transposition, and key change (modulation). Students who wish to explore the art of musical composition will find this course especially useful, as two creative projects are assigned: the composition of a pair of melodies in the major and minor modes, and a 32-bar piece which changes key. Preparation for these projects is provided through listening and analysis of works in a variety of musical styles. Students having completed this course will be prepared to enter Music 203, the first semester of the theory sequence for music majors.</p> <p>Attributes: A: Creative Expression Humanities</p>

MUSC	H122B	<p>African Americans, Music, and the American Experience</p> <p>How did African-American expressive culture become such an influential presence in the US? This course surveys the myriad genres and styles of African American Music from early jazz styles and urban blues to the birth of rhythm 'n blues, as well as contemporary expressions such as hip-hop. It explores development and impact of popular music particular to the United States, including its commercialization, mass mediation, and the penetration of mainstream America and the global market. Students will be introduced to seminal figures in the creation of African American popular music.</p> <p>Enrollment Limit: 25.00</p> <p>Attributes: A: Meaning, Interpretation (Texts) Africana Studies Humanities</p>								
		2780	001	1.0	Edwin Porras	M W	10:00AM	11:25AM		0
MUSC	H132B	<p>Beethoven Then and Now</p> <p>An exploration of Beethoven's life and works, considered in the context of changing aesthetic and cultural values of the last two centuries. Students will listen to Beethoven's music, study his letters and conversation books, and read some of the many responses his art has engendered. In their written responses to all of this material, students will think in new ways about Beethoven's music, his artistic personality, about the ideas and assumptions that have guided the critical reception of art and life. They will learn to cultivate their skills as readers and listeners while improving their craft as writers. Open only to first-year students as assigned by the Director of College Writing.</p> <p>Crosslisted: Music, Writing Program</p> <p>Enrollment Limit: 12</p> <p>Attributes: First Year Writing</p>								
		2476	001	1.0	Richard Freedman	M W	2:30PM	3:55PM	ROB200	0
MUSC	H134B	<p>Electronic Music Evolution: From Foundational Basics to Sonic Horizons</p> <p>Electronic music, a constantly evolving entity, has revolutionized the way we create and experience music. This course, Electronic Music Evolution, offers a deep dive into its history, theory, and practical application. From the Telharmonium's inception to contemporary interactive performances, students will develop critical listening skills. Hands-on use of cutting-edge production tools will enable students to compose electronic music works, exploring composition and performance alongside emerging electronic music theories. This course does not count for the Music major or minor.</p> <p>Lottery Preference: Music major / Music minor</p> <p>Enrollment Limit: 15.00</p> <p>Attributes: A: Creative Expression Humanities</p>

MUSC	H243B	Ethnomusicology in Theory and Practice								
What do ethnomusicologists do? This course is an introduction to the field of ethnomusicology. It surveys its history, examines various ethnomusicological theories and perspectives, and explores its methodologies. We will read and discuss the works of major ethnomusicological scholars and explore the interdisciplinary nature of the field, particularly in connection with musicology, anthropology, and cultural studies. In order to encourage a deeper understanding of ethnomusicological perspectives and methods, the course includes a fieldwork-related project.

	2561	001	1.0	Edwin Porras		T Th	1:00PM	2:25PM		0
MUSC	H251B	Strange Music: Monsters, Ghosts, and Aliens on Stage and Screen								
Scholars of film often speak of the camera as an "all-seeing eye." But what role does the ear play in cinematic experience? This course will explore the history, character, and function of music (and sound) in the first half of the twentieth century (and beyond): how they worked with (and against) the camera's gaze to complicate narratives, to articulate time, and more generally to represent feeling and identity. This term will put special focus on the non-human: monsters, ghosts, aliens, and more generally the idea of the magical or supernatural. What does such radical Otherness sound like? How has it been represented musically? And how have composers and sound designers put such conventions to work in films of the last 100 years, from Metropolis and Nosferatu to Dune and Arrival? To answer these questions we'll explore the silents, the early sound film and (especially) the long arc of composers (from Eric Korngold to Bernard Herrmann and from John Williams to Hans Zimmer. We'll consider the legacy of Romanticism, the possibilities of Modernism, and even the Avant Garde, and learn about orchestration, harmony and thematic process as they contribute to cinematic narrative. We will also consider various theories of sound, music, and film staked out by film and operatic composers themselves, as well as critical and scholarly essays by leading writers on the monstrous, the alien, and the supernatural.										
Prerequisite(s): Music 203 or equivalent knowledge of music theory.

NEUR	H100B	Introduction to Neuroscience								
Neuroscience is an interdisciplinary field that seeks to understand the structure and functions of nervous system. Topics include evolution and development of the nervous system,neuroimaging and anatomy, neurophysiological basis of learning and memory, cognitive-behavioral development, and sensation and perception.										
Prerequisite(s): This course is not open to students who have previously taken HC Psych 217, HC Psych 260, or BMC Psych 218										
Enrollment Limit: 35										
Lottery Preference(s): 15 spaces reserved for first years.

NEUR	H399B	Neuroscience Senior Capstone								
		This course will survey empirical studies from several subdisciplines within the field of neuroscience (eg behavioral, cognitive, computational, molecular, etc) that advance our understanding of the brain. Through exposure to a diversity of approaches, it is hoped that students will be reminded that the boundaries that define the disciplines of neuroscience are blurred, and that it is the language of all these subdisciplines, that continue the advance of modern neuroscience. Each section of the course (defined by a given subdiscipline and relevant empirical articles) will culminate with a visit from a current researcher in that subdiscipline whose studies continue to advance our understanding of the brain. The visiting researcher will lead an in-class discussion about their research, as well as the path they took to get to their current position.

PEAC	H105H	Global Solidarity and Local Actions: Interdependence, Intercultural Understanding, Social Change								
		This course considers a civics of interdependence. We have a role to play, but who are “we,” what role is that, and what ideas, methods, and skills might help us take action for more just, inclusive, sustainable communities? We take up this analytical challenge and the action-oriented disposition it suggests, through consideration of key concepts in local-global civic inquiry and action - through the lens of the Philadelphia region and broader national and international partnerships. Pre-requisite(s): Students must be selected for a summer CPGC Fellowship. Enrollment Limit: 15.00 Attributes: Peace, Justice and Human Rights								
		2874	001	.5	Janice Anne Lion					0
PEAC	H201B	Applied Ethics of Peace, Justice and Human Rights								
		This course surveys major legal and ethical theories with a view to helping students understand arguments about peace, justice and human rights and formulate their own creative approaches to ethical problems. Theories will be applied to concrete problems of justice. No prerequisites. Enrollment Limit: 25 Lottery Preference: PJHR concentrators, then first-year students and sophomores Attributes: A: Meaning, Interpretation (Texts)								
		B: Analysis of the Social World				Health Studies		Humanities		
		International Studies				Peace, Justice and Human Rights

PEAC	H211B	Decolonial Theory: Indigeneity and Revolt This course is an introduction to "decoloniality," a mode of critical theory that examines and attempts to systematically undermine the notion that ascendance to power of European modernity (including contemporary American culture) can be understood without a constitutive and ongoing relation to colonial domination. This includes domination on the basis of race, gender, religion, and a variety of other ways that modern systems of rationality, governance, normalcy, order, and accumulation have been constructed through practices of domination and subjugation. The course focuses specifically on the American context, including the interplay between the African continent and North and South America. Key writers from Afro-diasporic, Afro-Caribbean, and indigenous Latin American perspectives will be studied in depth. While introducing students to salient currents in decolonial thought, the course will also examine relations between decolonial and postcolonial thought, as well as between decolonial theory and recent work in feminist and query theory. Enrollment Limit: 25 Attributes: B: Analysis of the Social World Gender and Sexuality Studies Humanities Peace, Justice and Human Rights								
		2581	001	1.0	Joshua Ramey	M W	2:30PM	3:55PM		0
PEAC	H222B	Human Rights and Culture This course offers an overview of the human rights system, looking at its basic elements and studying how it works. At the heart of this course is the question of "culture" and its relation to human rights. We will focus on the tensions and translations between human rights and culture and between global ideas and practices and local ones. The goal of the course is developing an understanding of human rights in practice and theorizing the intersections between social fields thought of as global and local. Crosslisted: Anthropology; Peace, Justice and Human Rights Prerequisite(s): Intro to Anthropology OR Intro to PJHR Enrollment Limit: 15 Attributes: B: Analysis of the Social World Peace, Justice and Human Rights Social Science

PEAC	H257B	Antigone's Echoes: Activism and the Law from Ancient Greece to today Where should the law come from, the individual or the state? How can you protest an unjust system, and how can an ancient story help you do it? Who owns a "Classic"? These are just a few questions that Sophocles' Antigone has raised for philosophers and playwrights from the Enlightenment to today. We'll read several versions of the Antigone myth and explore this character's enduring relevance to theories of gender, performance, world literature, and politics. Crosslisted: COML, PEAC. Enrollment Limit: 25.00 Attributes: A: Meaning, Interpretation (Texts) Gender and Sexuality Studies Humanities Peace, Justice and Human Rights								
		2865	001	1.0	Ryan Warwick	T	7:30PM	9:55PM		0
PEAC	H281B	Feminist Political Economy This course is an introduction to current debates in radical feminism. Beginning with the psychoanalytical, Marxist, and Black Radical feminists of the 1960's and 70's, the course outlines contemporary radical feminist positions on race, gender, consumption, domesticity, care, labor, ecology, and the prospects of collective life within and beyond capitalist planetary endgame. Crosslisted: POLS. Pre-requisite(s): PEAC 101 or 201 or any PHIL or POLS class, or consent of instructor. Lottery Preference: PJHR and GenSex students first Enrollment Limit: 25.00 Attributes: A: Meaning, Interpretation (Texts) Gender and Sexuality Studies Peace, Justice and Human Rights Social Science

PEAC	H325B	<p>Law: Settler and Indigenous Explores legal theories underpinning legal systems in settler colonial states. Studies settler legal forms and Indigenous legal forms alongside each other, and thinks about what gives law power, how that power stays in place, and what law is supposed to be and do for those who are guided by it. Readings include classics of settler/western legal theory and various Indigenous traditions. Assignments include papers, presentations, research, storytelling, and moot courts in multiple traditions. Pre-requisite(s): PEAC 101 or 201 or consent of instructor Lottery Preference: PJHR Concentrators Enrollment Limit: 15.00 Attributes: A: Meaning, Interpretation (Texts) Humanities Peace, Justice and Human Rights</p>								
	2669	001	1.0		Jill Stauffer	T	1:30PM	3:55PM		0
PEAC	H327B	<p>University City: Race, Power and Politics in Philadelphia For over twenty years, the largest private employer in Philadelphia has been the University of Pennsylvania and its hospital system. In fact, three of the top five largest employers are universities and their affiliated medical centers; Thomas Jefferson University and Temple University also make the cut. Including these institutions, there are fifty-five colleges and universities of varying size, shape, and public/private status in Philadelphia. How did it come to be that universities have taken on such a large political and economic role in not just Philadelphia, but many American cities that otherwise share little in common? This class aims to trace the history of higher education and its ongoing impact on the geography, economy, and culture of greater Philadelphia and U.S. urban space broadly. Practically, this means an attention to the urban landscape; social, cultural, and political movements that emerge from these institutions; and how non-profit institutions relate to government at every level. These wide aims require an interdisciplinary approach drawing on work in critical university studies, cultural studies, political and economic theory, history, urban studies, and critical theory. This class will be taught in Philadelphia as part of the Tri-Co Philly Program Prerequisites: Priority in registration will be given to students participating in the Tri-Co Philly Program. Remaining seats are available to other Tri-Co students, by lottery, if demand exceeds remaining spaces in the course. If you are interested in the program, you must fill out the application, which is due on Friday, November 3 by 11:59 pm (https://www.haverford.edu/philly-program). The program includes registering for two of three program's three courses: this course and Literature in and of Philadelphia, 1682-1865 (ENGL B307) OR History & Politics of Punishment (20E). Those not participating in the Philly program do not need to complete the application and can simply pre-register for the class. Enrollment limit 18 Attributes: B: Analysis of the Social World Education Peace, Justice and Human Rights Social Science</p>

PHIL	H111B	The Wicked and the Worthy The possibility of "doing good" in the world presumes that one can distinguish between good and bad actions, people, and consequences. But on what basis are we to make such distinctions? What grounds, if anything, our definitions of good and bad? This course examines such concerns through a survey of the history of ethical philosophy. In assessing ethical "first principles" we will consider as well questions of intentionality, power, and historical value. Readings include selections from Mill's Utilitarianism, Kant's Groundwork of the Metaphysics of Morals, and Nietzsche's Beyond Good and Evil. <i>Attributes: A: Meaning, Interpretation (Texts) Humanities</i>									
	2448	001	1.0	Jerry Miller		M W	1:00PM	2:25PM		0	
PHIL	H212B	Aristotle What are essences, and how do they figure in scientific knowledge? What are perception, imagination, thought, and desire, and how do they interact? What is human happiness? We will consider these and related questions, working through some of Aristotle's most influential discussions in philosophy of science, philosophy of mind, and ethics. <i>Attributes: A: Meaning, Interpretation (Texts) Humanities</i>									
	2450	001	1.0	Joel Yurdin		T Th	10:00AM	11:25AM		0	
PHIL	H215B	Phenomenologies of the Body What does phenomenology teach us about the body? Starting with foundational texts in phenomenology, this course will explore how phenomenology has come to be applied to differing approaches to the body. PHYS	H304B	Computational Physics An introduction to the methods and problems of computational physics, including matrix methods, ordinary differential equations, integration, eigensystems, Monte Carlo techniques, Fourier analysis, and iterative methods. Course will include a substantial independent project. Crosslisted: Physics, Astronomy, Computer Science Prerequisite(s): PHYS 213 or BMC PHYS 306 or instructor consent Enrollment Limit: 18 Lottery preferences as follows: Senior Physics, Astrophysics and astronomy majors Senior Scientific Computing Concentrators Junior majors Junior Scientific Computing Concentrators Other Seniors Sophomores Freshmen Attributes: C: Physical and Natural Processes Natural Science								
		1308	001	1.0	Daniel Grin	T Th	10:00AM	11:25AM		0
PHYS	H309B	Advanced Electromagnetism Boundary value problems, multipole fields, dielectric and magnetic materials; electromagnetic waves, propagation in dielectric media, conductors and waveguides; gauge transformations, radiating systems. Prerequisite(s): PHYS 214 and either PHYS H213 or PHYS B306 Attributes: C: Physical and Natural Processes Natural Science								
		2411	001	1.0	Andrea N. Lommen	M W	10:00AM	11:25AM		0
PHYS	H352I	Topics in Astrophysics: Extragalactic Data Science A 0.5 credit upper level astronomy/astrophysics elective, which can be taken in series with the other 0.5 credit upper level Astro elective offered the same semester, or as a stand-alone course. This class will cover the basics of modern extragalactic science (a review of our knowledge of the Milky Way and external galaxies) alongside hands on projects involving data science/statistical techniques used to investigate them. Assessment will be highly project based, with regular coding assignments (in python) done during class time, and guided reading of both current, and classic astrophysical literature. Students will leave with an understanding of extragalactic astrophysics as a modern data focused science. Crosslisted: PHYS. Pre-requisite(s): ASTR204 Attributes: C: Physical and Natural Processes Natural Science								
		2412	001	.5	Karen L. Masters	M	1:00PM	2:25PM		0
PHYS	H356I	Topics in Physics/Astronomy: Introduction to Astroparticle Physics Astroparticle physics is the study of fundamental particles traveling through space coming from various astrophysical sources. The energies of some of these particles are much higher compared to the ones achievable by the most powerful human-made particle accelerators. In this course, we will learn about cosmic rays, Gamma-rays, neutrinos, neutrino oscillations and masses, dark matter cross-section, freezeout, evidences, candidates, and searches. There will be an emphasis on dark matter and neutrino physics and detection. Crosslisted: ASTR. Pre-requisite(s): ASTR 204 or BMC equiv. PHYS 214 or BMC equiv. (can be taken concurrently) Lottery Preference: Juniors and seniors majoring in physics, astrophysics, and astronomy.

POLS	H161B	Global Political Economy: States, Markets, and People in the Era of Globalization This course serves as an introduction to Global Political Economy (GPE). It not only surveys fundamental GPE concepts but also delves into international economic institutions and critical problem areas. Following an exploration of key theoretical approaches, emphasis will be placed on diverse GPE topics, such as trade, multinational corporations, finance, development, environment, and issues related to food and hunger. The primary focus is on economic globalization and its implications for the state and society. Additionally, case studies on various topics will facilitate discussions on different approaches and policy options in GPE. Enrollment Limit: 40

		2596	001	1.0	Zachary W. Oberfield	T Th	10:00AM	11:25AM		0
POLS	H228B	Urban Policy Assessment of public policies aimed at revitalizing U.S. cities following several decades of suburbanization and capital disinvestment. Focus on economic development, housing and community development, environmental protection, transportation, education, crime, and the management of regional sprawl. <i>Attributes: Social Science</i>								
		2291	001	1.0	Stephen J. McGovern	M W	1:00PM	2:25PM		0
POLS	H253B	Introduction to Terrorism Studies After being marginalized in international relations scholarship for years, in the aftermath of 9/11 terrorism has moved to the forefront of scholarly interest. The purpose of this course is to survey the various theories concerning terrorism from diverse perspectives employing rationalist and psychological theories to explain terrorism-related phenomena. Enrollment Limit: 30 <i>Attributes: B: Analysis of the Social World Social Science</i>								
		2290	001	1.0	Barak Mendelsohn	T Th	11:30AM	12:55PM		0
POLS	H271B	Comparative and Transnational Studies: From Kuala Lumpur to Kansas City How can comparative lenses on the one hand, and transnational lenses, on the other, make sense of a globalizing world and its workings? This course uses both lenses to understand the ways we live now. Also, the ideas and practices that shaped them. So we study, for example, how modernity was built by the Black Atlantic, by creolizing, and by different diasporas and their homelands. And how constitutionalisms in Spanish America and U. S. states resemble each other. Or how the Arab world and East Asia shared debates over dealing with Eurocentrism. Enrollment Limit: 25 <i>Attributes: A: Meaning, Interpretation (Texts) B: Analysis of the Social World Latin American, Iberian, and Latinx Studies Social Science</i>								
		1220	001	1.0	Thomas J. Donahue	W	1:30PM	3:55PM		0
POLS	H274B	Ends and Means: Moral Choices in Politics Can politics be moral? Can the end justify the means? Examines how to make moral choices in politics, and the moral dilemmas it poses, by scrutinizing how great theories answered these questions, including Machiavelli, Thoreau, Martin Luther King, Jr., Malcolm X, Camus, Sartre, Dewey, Trotsky, Rosa Luxemburg, Reinhold Niebuhr, and Elizabeth Anscombe. A special focus on the ethics of war. Prerequisite(s): Must have at least one course in Political Science <i>Attributes: Social Science</i>								
		1225	001	1.0	Thomas J. Donahue	Th	1:30PM	3:55PM		0
POLS	H278B	The Earth: Ethics, Politics, and Economics								

Haverford College Spring 2024 Course Guide

					How should we deal with clashes among environmental values, economic growth, and what people want? Examines the clashing theories and interpretations of facts that underlie current environmental debates. Focus on climate change and inter-relations among ethical, political, and economic concerns. Enrollment Limit: 25 <i>Attributes: B: Analysis of the Social World Social Science</i>					
		1657	001	1.0	Thomas J. Donahue	M	1:30PM	3:55PM		0
POLS	H281B				Feminist Political Economy This course is an introduction to current debates in radical feminism. Beginning with the psychoanalytical, Marxist, and Black Radical feminists of the 1960's and 70's, the course outlines contemporary radical feminist positions on race, gender, consumption, domesticity, care, labor, ecology, and the prospects of collective life within and beyond capitalist planetary endgame. Crosslisted: POLS. Pre-requisite(s): PEAC 101 or 201 or any PHIL or POLS class, or consent of instructor. Lottery Preference: PJHR and GenSex students first Enrollment Limit: 25.00 <i>Attributes: A: Meaning, Interpretation (Texts) Gender and Sexuality Studies Peace, Justice and Human Rights Social Science</i>					
		2871	001	1.0	Joshua Ramey	M W	11:30AM	12:55PM		0
POLS	H286B				Religion and American Public Life What is religious freedom? How have debates about the role of religion in public life shaped American politics? And how have anxieties about race, gender, and sexuality determined the limits and possibilities of religious freedom? Grounding contemporary political debates in their historical context, students analyze speeches, court cases, visual and popular culture, and political theory and philosophy to explore the complex relationship between religion and politics in the U.S. Enrollment limit: 25 <i>Attributes: Humanities</i>					
		2439	001	1.0	Molly Farneth	M W	11:30AM	12:55PM		0
POLS	H294B				Federalism and Constitutional Law What does it mean to think like a lawyer? We will explore that question (and many others) as we examine the area of constitutional law known as federalism. The federalism debate is about which government—the federal government or each state—should decide hot-button issues such as whether to legalize marijuana; whether to require masks to curb the spread of COVID-19; whether to ban the sale of food made from animals confined in cruel conditions; whether to allow the sale of abortion-inducing drugs; and whether to give undocumented students (Dreamers) the benefit of in-state college tuition. Readings will be abridged versions of Supreme Court cases, lower court cases, and related commentary. Writing assignments will be case summaries, two short papers, and one longer paper in lieu of an exam. Classes will be discussion based, and there will be opportunities to play the role of lawyer or judge in mock oral arguments known as moot courts. Enrollment Limit: 20.00 <i>Attributes: B: Analysis of the Social World Social Science</i>					
		1758	001	1.0	Alisa Klein	M	1:30PM	3:55PM		0
POLS	H298B				From National-liberation Republic to Populist State: The State and Economy in Turkey This course offers a comprehensive review of modern Turkish history, delving into the origins and consequences of its current challenges. It examines these issues in the broader context of semi-peripheral countries and dependence. The topics encompass various social, political, and economic challenges that Turkey has faced since late Ottoman times, including underdevelopment, problems in democratic consolidation, relations with the West, industrialization, class conflict, military coups, economic liberalization, economic crises, political cleavages, and the rise of AKP's authoritarian populism. Pre-requisite(s): One semester of Political Science is recommended but instructor's permission is sufficient. Enrollment Limit: 25.00 <i>Attributes: B: Analysis of the Social World Middle Eastern & Islamic Studies Social Science</i>					
		2877	001	1.0	Yonca Ozdemir	M W	10:00AM	11:25AM		0

	Prerequisite(s): Instructor consent									
	Enrollment Limit: 5									
		1218	001	.5						0
PSYC	H100B	Foundations of Psychology								
	An introduction to the study of mind and behavior. Topics include biological, cognitive, personality, abnormal, and social psychology, as well as a general consideration of the empirical approach to the study of behavior. This course is a prerequisite for most other 200 and 300 level psychology courses. However, in most cases, this prerequisite may be met with an AP Psychology score of 4 or 5 or IB Psychology credit.									
	Prerequisite(s): Students with AP Psychology credit from high school (and a score of 4 or 5 on the AP exam) have the option to waive the Foundations course and enroll in upper-level courses; this should be done only after consultation with a faculty member in the Psychology Department. Students are welcome to take PSYCH 100 even if they have AP Psychology credit from high school (and a score of 4 or 5 on the AP exam).									
	Enrollment Limit: 35									
	Lottery Preference(s): 25 spaces reserved for incoming freshmen. Then priority as follows: freshmen, sophomores, juniors, seniors									
	Attributes: B: Analysis of the Social World Social Science									
		1167	002	1.0	Alexander LaTourrette	T Th	10:00AM	11:25AM		0

PSYC	H203B	Cognition								
	This course provides an overview of the field of Cognitive Psychology, the branch of psychology that studies how we think. Over the semester we will survey classic and contemporary theory and findings on a wide range of mental processes that we use every day - from attention and memory to language and problem solving - and our goal will be to understand how the human mind works! Pre-Requisite(s): PSYC H100 or PSYC B105 or Psychology AP Score 4+ or consent.									
	Enrollment Limit: 35									
	Lottery Preferences: PSYC Major/Minor (by class); Neuroscience Major/Minor (by class); Senior; Junior; Sophomore									
	Attributes: B: Analysis of the Social World Social Science									
		2784	001	1.0	Alexander LaTourrette	T Th	2:30PM	3:55PM		0
PSYC	H215B	Personality Psychology								
	An examination of the fundamental issues and questions addressed by personality psychology, including: What is personality? What are its underlying processes and mechanisms? How does personality develop and change over time? What constitutes a healthy personality? This course will explore these questions by considering evidence from several major approaches to personality (trait, psychodynamic, humanistic, and social-cognitive), and it will encourage students to develop a dynamic understanding of human personality that is situated within biological, social, and cultural contexts.

PSYC	H317I	Laboratory in Behavioral Neuroscience Prerequisite(s): Past or concurrent enrollment in PSYC 217 (Behavioral Neuro) is required. Completion of Stats/Methods (PSYC H200 or PSYC B205) is strongly recommended; however, concurrent enrollment with Stats/Methods may be permissible with consent Enrollment Limit: 15 Lottery preference(s): priority to senior psychology or neuroscience majors, followed by junior psychology or neuroscience majors, followed by psychology or neuroscience minors. Attributes: <i>C: Physical and Natural Processes Natural Science</i> 1183 001 .5 Laura E. Been T 1:30PM 3:55PM 0								
PSYC	H335B	Narrative Identity This course is an in-depth examination of the field of narrative identity, which takes as its guiding assumption that identity is constructed through finding meaning in past experiences and narrating our life stories. Course readings will draw from both quantitative and qualitative traditions and from several fields of psychology (developmental, personality, cultural, and clinical). Topics to be addressed include the development of narrative identity from childhood to old age, how cultural, historical, and social-structural forces shape narrative identity, and the role of narrative transformation in therapeutic processes, self-growth, and social change.

PSYC	H361B				Communication Disorders Seminar What are communication disorders? What are the characteristics of these disorders? What can different communication disorders tell us about normal speech and language processing? In this course, students will learn about common disorders that affect communication throughout the lifespan, including developmental, acquired, and neurogenic communication disorders in the speech, language, and hearing domains. We will draw on empirical studies and theoretical reviews to examine potential causes and underlying mechanisms of different disorders. Pre-requisite(s): PSYC100 Foundations of Psychology, PSYC200 Research Methods and Statistics, and one additional 200-level Psychology or any 100-level Linguistics course Lottery Preference: Senior psychology majors, Junior psychology majors, Senior psychology minors, Junior psychology minors, Linguistics majors and minors, all others by class year. Enrollment Limit: 12.00 Attributes: B: Analysis of the Social World Social Science					
	2630	001	1.0	Peiyao Chen		F	11:00AM	1:25PM		0
PSYC	H367B				Myth of Multitasking Before you continue reading, take some time to try the following: pat your head while rubbing your stomach. Although silly, this is a clear example of multitasking. This seminar course focuses on our (in)ability to multitask. The purpose of this course is to introduce students to major issues, theories, methods, empirical data, and real-world implications for

RELG	H186B	Reinventing Quakerism: Haverford College, Rufus Jones, and the Invention of Liberal Quakerism Quakerism isn't stable. It varies from place to place and from generation to generation. There is a real sense in which Orthodox Quakerism (the form of Quakerism that is most closely connected to Haverford College) was reinvented in the late nineteenth and early twentieth centuries. Students in this course will examine some of the changes that Orthodox Quakerism underwent between the 1860s and the 1940s by analyzing the life and thought of Rufus Jones (1863-1948). Jones is the most famous Quaker ever to teach at Haverford and one of most influential scholars ever produced by the Religious Society of Friends. Open only to first-year students as assigned by the Director of College Writing. Enrollment Limit: 12 <i>Attributes: First Year Writing</i>								
		2477	001	1.0	David Harrington Watt	T Th	1:00PM	2:25PM		0
RELG	H208B	Sacred Matters: Material Dimensions of Religious Experience in South Asia An examination of the bodily, sensorial and emotional experience of things, substances, architecture, sculpture, landscape, textiles, and texts, the aesthetics of epic poetry, drama, song, dance in South Asian religious cultures. Topics may include how such practices inscribe religious experience, provide parameters for social organization, and offer religious critique. Prerequisite(s): One course in Religion or Visual Studies Enrollment Limit: 15 <i>Attributes: B: Analysis of the Social World Humanities Visual Studies</i>								
		2437	001	1.0	Pika Ghosh	T Th	10:00AM	11:25AM		0
RELG	H222B	Gnosticism The phenomenon of Gnosticism examined through close reading of primary sources, including the recently discovered texts of Nag Hammadi. Topics include the relation of Gnosticism to Greek, Jewish, and Christian thought; the variety of Gnostic schools and sects; gender imagery, mythology and other issues in the interpretation of Gnostic texts. Enrollment Limit: 25 <i>Attributes: A: Meaning, Interpretation (Texts) Humanities</i>								
		2426	001	1.0	Anne Marie McGuire	M W	10:00AM	11:25AM		0
RELG	H254B	RAP and Religion: Rhymes about God and the Good We will explore the origins, existential, and ethical dimensions of Rhythm and Poetry (RAP) music. Giving attention to RAP songs written and produced by African American artists, including Tupac, Nas, Jay-Z, The Roots, Lauryn Hill, and Kanye West, we will analyze their work with an interest in understanding a) the conceptions of God and the good reflected in them, b) how these conceptions connect to and reflect African American social and cultural practices, and c) how the conceptions under consideration change over time. Enrollment Limit: 25 Lottery Preference(s): Senior religion majors, then junior religion majors, then all others <i>Attributes: Africana Studies B: Analysis of the Social World Humanities</i>

Haverford College Spring 2024 Course Guide

Subject	Cat Nbr	CLNbr	Sctn	Crd	Instructor(s)	Days	Start	End	Room	Enrld
					<p>What is religious freedom? How have debates about the role of religion in public life shaped American politics? And how have anxieties about race, gender, and sexuality determined the limits and possibilities of religious freedom? Grounding contemporary political debates in their historical context, students analyze speeches, court cases, visual and popular culture, and political theory and philosophy to explore the complex relationship between religion and politics in the U.S.</p> <p>Enrollment limit: 25</p> <p>Attributes: Humanities</p>					
		2438	001	1.0	Molly Farneth	M W	11:30AM	12:55PM		0
RELG	H295B	<p>Quakers, War, and Slavery, 1646-1877</p> <p>In the 1640s and 50s, many Quakers believed that Christians should fight in wars; none of them (as far as we know) believed that Christians ought not own slaves. By 1723, most Quakers had renounced war; a good many of them had begun to assert that owning slaves was contrary to the will of God. Students in this course will try to determine how—and also why—Quakers changed their minds about war and slavery.</p> <p>Crosslisted: Independent College Programs; Peace, Justice and Human Rights; Religion</p> <p>Prerequisite(s): First Year Writing</p> <p>Enrollment Limit: 15</p> <p>Lottery Preference(s): Religion majors and PJHR concentrators</p> <p>Attributes: A: Meaning, Interpretation (Texts) B: Analysis of the Social World Humanities Peace, Justice and Human Rights</p>

	2746	001	1.0		Marla Kohlman	M W	2:30PM	3:55PM		0
SOCL	H155B	Foundations in Social Theory								
This seminar provides an introduction to sociology, to the doing of sociology, through an examination of selected major works in the discipline. We use these works as exemplifications of how we might do social theory, not as texts to be criticized. The two semesters of this course are autonomous; either semester in the sequence may be taken alone, and either semester may be taken first. Together, the two mesh into a systematically-constructed whole, leading to a more coherent perspective on the accomplishments and future tasks of sociology than either provides alone.										
Section 001 with Gould will highlight works by Durkheim and Freud (supplemented by a bit of Parsons, Mead, etc.).										
Section 002 with McKeever will highlight works by Durkheim, Mead, and Schutz.										
Attributes: B: Analysis of the Social World Social Science

SPAN	H218B	Introduction to Magical Realism This course introduces the body of Latin American literature known as magical realism. The authors of the literary boom transculturate European cultural elements with aspects of criollo, indigenous and African traditions in their works. This style's leit motifs include folk beliefs, time and space warping, and the normalization of magic. Critical moments in Latin American history, such as the Cuban Revolution, the long history of dictatorships and strongmen, and the shadow cast by U.S. foreign policy and corporations, are essential to understanding these texts. Issues of race, gender, and class will be central in class discussions. This class can be taken in connection with the 300-level class on magical realism or independently. Pre-requisite(s): Students who completed SPAN 102 or placed into 200-300 level courses can take this course Enrollment Limit: 25.00 Attributes: A: Meaning, Interpretation (Texts) Humanities Latin American, Iberian, and Latinx Studies 2781 001 1.0 Ariana Huberman M 1:30PM 3:55PM 0								
SPAN	H222B	Rethinking Latin America in Contemporary Narrative An examination of literary texts, cultural production and practices that address issues of coloniality, subalternity, gender violence, forced disappearance and displacement, among others. This course explores how the concept of "nation" has marginalised different identities (Indigenous people, women, LGBTQ+), how they have become targets of violence, and what are the connections between coloniality, racism, and forced disappearance as a current practice. However, this course highlights community practices of resilience and agency. For example: radical change from Indigeneity literary works to decolonial Indigenous movements, from genocide to testimonials and Commssion of Truth, from forced disappearance to national search brigades and caravans of mothers looking for their beloved ones. This course is conducted in Spanish. Crosslisted: Spanish, Comparative Literature. Prerequisite(s): SPAN 102, placement, or instructor consent Enrollment Limit: 25 Attributes: A: Meaning, Interpretation (Texts) B: Analysis of the Social World Humanities 2857 001 1.0 Aurelia Gómez De T Th 10:00AM 11:25AM 0 Unamuno								
SPAN	H253B	Hispanic Caribbean Migration Tales Students will learn about different Hispanic Caribbean migratory experiences through a selection of short stories, novels, memoirs, and essays, as well as in film, and performative production. The tales featured in this course will consider how gender and sexuality shape migration experiences. The texts that will be analyzed are mostly originally written in Spanish. Crosslisted: Spanish, Comparative Literature Prerequisite(s): SPAN H102 or 200-300 level in the placement test Enrollment Limit: 25 Attributes: A: Meaning, Interpretation (Texts) Humanities Latin American, Iberian, and Latinx Studies 2570 001 1.0 Emily Sterk M W 11:30AM 12:55PM 0								
SPAN	H273B	The Invention of Pablo Neruda: Poetics and Politics This course deals with the principal works of Pablo Neruda's long career as a poet. Close readings of his major poems will be accompanied by an examination of the criticism and reception of Neruda's poetry at different stages of his trajectory. Special attention will be paid to the creation and elaboration of Neruda's image as a poet, cultural icon, and political figure in Chile and in the Spanish-speaking world. This course is conducted in Spanish. Prerequisite(s): SPAN 102, placement, or instructor consent

SPAN	H322B	Politics of Memory in Latin America An exploration of the dynamics of memory, narration, censorship and oblivion after a period of state violence either under a dictatorship or an official democracy. This course analyses and compares literary genres (testimonies, diaries, poetry and fiction), visual archives, documentary films, practices and projects of memory (Parque por la Paz Villa Grimaldi, Museo de la Memoria in Chile, Museo Casa de la Memoria Indómita in Mexico, "sitios de memoria" and digital resources). Students will be able to compare debates, outcomes and current controversies of production of memory in Chile after the coup and dictatorship of Pinochet, and in Mexico after the repression of the student movement of '68 and the guerrilla movement. This course is conducted in Spanish. Cross-listed: Spanish, Comparative Literature, PJHR Attributes: Gender and Sexuality Studies Humanities Latin American, Iberian, and Latinx Studies Peace, Justice and Human Rights

SPAN	H331B	Liminal Bodies: Emotional Landscapes and Gender in Pan-Mediterranean Literatures and Cultures The course explores gender in late medieval to 17th century Iberia, including canonical and lesser-known works, texts written by women, cultural materials, plays, and popular chapbooks. It will delve into specific analyses of the liminal representations of gender and sexuality in Ibero-romance materials, including a critical review of the limitations and liberties afforded by gender and giving special attention to the thematical evolution of gender across centuries in Pan-Mediterranean literatures and cultures. Taught in Spanish. Pre-requisite(s): Completed 102 or placement exam in 200-300 level courses or instructor consent. Lottery Preference: None Enrollment Limit: 15.00 Attributes: A: Meaning, Interpretation (Texts) Gender and Sexuality Studies Humanities Latin American, Iberian, and Latinx Studies

SPAN	H490B	Senior Departmental Studies The course will consist of two one-semester parts. The first, taken in the fall semester, will have the format of a seminar under the supervision of one Spanish department faculty member. Students will also consult with other professors in the department (potential thesis directors). The purpose of this seminar is to prepare students for the research and writing their senior theses by 1) enhancing and refining the reading tools and critical approaches to Spanish and Latin American texts; 2) elucidating and contextualizing relevant aspects of literary history, theory, and culture 3) determining the thesis topic, key secondary sources and approach to be deployed in writing the thesis, and 4) polishing the skills and methods for successful research and proper use of available resources. Problems in literary and cultural analysis-selected with a view to their pertinence in relation to the group's interests-will be discussed through close readings of selected

WRPR	H135B	Health and Humanities Over the last few decades, "medical humanities" and "health humanities" programs have been popping up in health professional schools across the country. In these courses, students study works of art, literature, history, and philosophy in the hopes that these endeavors will help them become better healthcare providers. But what exactly are "the humanities"? How do they differ from "the arts" or "humanity" itself? And how does a humanistic education benefit healthcare providers and their patients? Open only to first-year students as assigned by the Director of College Writing. Enrollment Limit: 12.00 Attributes: First Year Writing Health Studies

WRPR	H139B	Does Representation Matter? In this course, students will explore theories of representation, along with critical race studies, structuralism and poststructuralism, global feminisms and neoliberalism, to think through contemporary discourses (like #Oscarssowhite and Girlboss Feminism) that claim representation matters when it comes to racial and gender justice. Lottery Preference: First year students as assigned by the Director of College Writing. Enrollment Limit: 12.00 Attributes: Africana Studies First Year Writing Gender and Sexuality Studies								
		2607	001	1.0	Connie McNair	T Th	10:00AM	11:25AM		11
		2608	002	1.0	Connie McNair	T Th	1:00PM	2:25PM		12
WRPR	H150B	Approaches to Literary Analysis Intended like other sections of the Writing Program to advance students' critical reading and analytical writing skills, this course is geared specifically towards introducing students to the discipline that studies the literary traditions of the English language. One of its aims is to explore the broad range of thematic interests inherent in these traditions, sharing as they do common roots in the history of our language and its influences. The powers and limits of language; ideas of character and community, and the relation between person and place; heroic endeavor and the mystery of evil; loss and renovation these are among the themes to be tracked through various strategies of literary representation and interpretation in a variety of genres (epic, narrative, and poetry) and modes (realism, allegory, and romance), and across a range of historical periods. Our goal is to develop the vocabulary, skills, and knowledge necessary to understand not only how we decide what literary texts mean, but also how literary texts generate and contemplate meaning. Open only to first-year students as assigned by the Director of College Writing. Enrollment Limit: 12 Attributes: First Year Writing								
		1464	001	1.0	Joshua Kopin	T Th	10:00AM	11:25AM		12

WRPR	H151B	Through the Looking Glass: Ancient Sexuality and Modern Queer Politics								

Haverford College Spring 2024 Course Guide

Subject	Cat Nbr	CLNbr	Sctn	Crd	Instructor(s)	Days	Start	End	Room	Enrld	
					In this course, we will examine the influence of Greco-Roman antiquity on the way that we talk about sex and sexuality today, in particular, how queer people have used the Classics to define their own identities. There follows a series of questions: What is at stake when we see ourselves in the past? What does it mean to identify an ancient person as queer? In these histories, which elements are emphasized, which are left out? Lottery Preference: First year students as assigned by the Director of College Writing. Enrollment Limit: 12.00 Attributes: First Year Writing						
		2613	001	1.0	Ryan Warwick	T Th	1:00PM	2:25PM		11	
WRPR	H155B	Origin Stories: Narrating Asian America In this course we will read a range of origin stories--creation narratives, memoirs, alter/native accounts of settler colonialism, and trickster tales--that delineate constructions of identity and constitutions of community with a focus on the ways in which writers and artists represent ongoing "encounters" between indigenous and imperial cultures, examining inventive work that play with genres ranging from the lyric to the epic to speculative fiction as a means of offering new ways of understanding history and imagining the future. Open only to first-year students as assigned by the Director of College Writing. Enrollment Limit: 12 Attributes: Asian American Studies First Year Writing									
		1467	001	1.0	Theresa M. Tensuan	T Th	11:30AM	12:55PM		12	
WRPR	H158B	Human Rights in the Age of Terror This course examines the effect of terrorist attacks on the targeted population (or government) and strategies behind the recruitment and proliferation of such violence. While explicit rules govern behavior in the face of a terrorist attack, terrorism often makes a state vulnerable to bending laws and violating rights. Texts include the rules of interrogation from the Counterinsurgency Field Manual and legal memoranda from after 9/11 that narrowed the definition of torture in the Geneva Conventions. Lottery Preference: First year students as assigned by the Director of College Writing. Enrollment Limit: 12.00 Attributes: First Year Writing									
		2632	001	1.0	Patricia Kennedy	T Th	1:00PM	2:25PM		12	
WRPR	H186B	Reinventing Quakerism: Haverford College, Rufus Jones, and the Invention of Liberal Quakerism Quakerism isn't stable. It varies from place to place and from generation to generation. There is a real sense in which Orthodox Quakerism (the form of Quakerism that is most closely connected to Haverford College) was reinvented in the late nineteenth and early twentieth centuries. Students in this course will examine some of the changes that Orthodox Quakerism underwent between the 1860s and the 1940s by analyzing the life and thought of Rufus Jones (1863-1948). Jones is the most famous Quaker ever to teach at Haverford and one of most influential scholars ever produced by the Religious Society of Friends. Open only to first-year students as assigned by the Director of College Writing. Enrollment Limit: 12 Attributes: First Year Writing									
		2478	001	1.0	David Harrington Watt	T Th	1:00PM	2:25PM		0
